DESCRIPTION

Atlas of Small Animal Ultrasonography, Second Edition is a comprehensive reference for ultrasound techniques and findings in small animal practice, with more than 2000 high-quality sonograms and illustrations of normal structures and disorders.

- Provides a comprehensive collection of more than 2000 high-quality images, including both normal and abnormal ultrasound features, as well as relevant complementary imaging modalities and histopathological images

- Covers both common and uncommon disorders in small animal patients

- Offers new chapters on practical physical concepts and artifacts and abdominal contrast sonography

- Includes access to a companion website with over 140 annotated video loops of the most important pathologies covered in each section of the book

ABOUT THE AUTHOR

Dominique Penninck, DVM, PhD, DACVR, DECVDI, is Professor of Diagnostic Imaging in the Department of Clinical Sciences, Cummings School of Veterinary Medicine, Tufts University.

Marc-André d’Anjou, DMV, DACVR, is Clinical Radiologist at Centre Vétérinaire Rive-Sud in the Montréal area, as well as at the Faculty of Veterinary Medicine of the Université de Montréal, where he was a professor for ten years.
Both are leading researchers in small animal ultrasonography and actively involved in helping students and veterinarians improve their sonographic skills using innovative multimedia teaching tools.
