### DESCRIPTION

This is a seminal text uniquely dedicated to oral hard tissue pathology, presenting the growth of clinical knowledge and advancement in the field in recent years. Starting with a discussion of numerical and formative anomalies and unusual eruption, the book goes on to consider caries, erosion, resorption and toothwear, as well as tooth fractures and discolouration, and ends with a chapter on congenital syndromes with dental anomalies.

*Pathology of the Hard Dental Tissues* is an invaluable reference for specialist practitioners and researchers as well as dental students, combining a scholarly overview of the field with clinical management protocols.

Includes prevention techniques as well as treatment regimes

- Contains many colour clinical photographs
- Accompanied by a large number of references
- Provides helpful tables to categorise the causes and characteristics of lesions
- Written by a leading expert in the field

---

## ABOUT THE AUTHOR

Albert H B Schuurs PhD is an associate lecturer at the Academic Center for Dentistry in Amsterdam (ACTA). During his career at ACTA and in his clinical practice, he has developed particular expertise in the field of oral hard tissue pathology.

---
