DESCRIPTION

Highly Commended at the British Medical Association Book Awards 2016

*Immunology Lecture Notes* provides a thorough grounding in basic concepts of immunity. Covering the core components of the immunology curriculum at medical school, it presents a concise overview of the immune system, its interactions with pathogens, the major areas of immunopathology, including immunodeficiency, allergy, autoimmunity, lymphoproliferative diseases and transplantation, and their therapy.

*Immunology Lecture Notes* includes:

- Full-colour descriptive illustrations and diagrams throughout, supplemented by new molecular graphics and anatomical scans
- New clinical cases developed as themes throughout the book to illustrate the practical application of immunological principles
- Fully updated self-assessment questions with expanded explanation of answers

With learning objectives and key points guiding you through the vital concepts, *Immunology Lecture Notes* will help you to address the key disorders of the immune system, and use immunological developments in clinical practice.
