The Wiley Handbook of Contextual Behavioral Science
Robert D. Zettle, Steven C. Hayes, Dermot Barnes-Holmes, Anthony Biglan

DESCRIPTION

The Wiley Handbook of Contextual Behavioral Science describes the philosophical and empirical foundation of the contextual behavioral science movement; it explores the history and goals of CBS, explains its core analytic assumptions, and describes Relational Frame Theory as a research and practice program.

- This is the first thorough examination of the philosophy, basic science, applied science, and applications of Contextual Behavioral Science
- Brings together the philosophical and empirical contributions that CBS is making to practical efforts to improve human wellbeing
- Organized and written in such a way that it can be read in its entirety or on a section-by-section basis, allowing readers to choose how deeply they delve into CBS
- Extensive coverage of this wide ranging and complex area that encompasses both a rich basic experimental tradition and in-depth clinical application of that experimental knowledge
- Looks at the development of RFT, and its implications for alleviating human suffering
Robert D. Zettle is Professor of Psychology at Wichita State University, USA. He serves on the editorial board of several journals including *Behavior Modification, International Journal of Behavioral Consultation & Therapy* and *The Psychological Record*. Professor Zettle has contributed many chapters to various books, and is the author of *ACT for Depression* (2007).

Steven C. Hayes is Nevada Foundation Professor at the Department of Psychology at the University of Nevada, USA. An author of 36 books including the best selling *Get Out of Your Mind and Into Your Life* (2005), his research demonstrates how language and thought leads to human suffering. He developed *Acceptance and Commitment Therapy*, and *Relational Frame Theory*, a contextual approach to language and cognition. Dr. Hayes has received the Lifetime Achievement Award from the Association for Behavioral and Cognitive Therapy.

Dermot Barnes-Holmes is foundation Professor of Psychology at the National University of Ireland Maynooth, and is known for the analysis of human language and cognition through the development of Relational Frame Theory with Steven C. Hayes, and its application in various psychological settings. Professor Barnes-Holmes has published over 250 scientific articles, chapters and books.

Tony Biglan is Professor of Psychology and Director at the Center for Prevention of Problems in Early Adolescence at Oregon Research Institute, USA. His research over the past 30 years has helped to identify effective family, school, and community interventions to prevent the most common and costly problems of childhood and adolescence.
