DESCRIPTION

The management of construction projects is a wide ranging and challenging discipline in an increasingly international industry, facing continual challenges and demands for improvements in safety, in quality and cost control, and in the avoidance of contractual disputes.

*Construction Management* grew out of a Leonardo da Vinci project to develop a series of Common Learning Outcomes for European Managers in Construction. Financed by the European Union, the project aimed to develop a library of basic materials for developing construction management skills for use in a pan-European context. Focused exclusively on the management of the construction phase of a building project from the contractor’s point of view, *Construction Management* covers the complete range of topics of which mastery is required by the construction management professional for the effective delivery of new construction projects.

With the continued internationalisation of the construction industry, *Construction Management* will be required reading for undergraduate and postgraduate students across Europe.

ABOUT THE AUTHOR

**Eugenio Pellicer, Civil Engineer, PhD**, Associate Professor (senior Lecturer), Universitat Politecnica de Valencia, Spain

**Víctor Yepés, Civil Engineer, PhD**, Associate Professor (Senior Lecturer), Universitat Politecnica de Valencia, Spain
Jose C. Teixeira, Civil Engineer, PhD, Associate Professor (Senior Lecturer), Universidade do Minho, Portugal
