The Nuts and Bolts of Implantable Device Therapy: Pacemakers
Tom Kenny

DESCRIPTION

- Tom Kenny, one of the best-known and well-respected educators in EP brings his signature style to this new primer
- Practical, accessible, highly illustrated approach makes learning easy
- Provides an overview of the algorithms and devices offered by the world’s five pacemaker manufacturers
- Offers clinicians learning objectives, test questions and essential points in bulleted lists
- Perfect introductory guide to the topic, assumes little baseline knowledge and appropriate for residents, fellows, EP nurses, general clinical cardiologists, EP fellows and industry professionals

ABOUT THE AUTHOR

Tom Kenny, FHRS, CCDS

Tom Kenny has always been an educator. From his start as a Critical Care Educator for the North Broward Hospital District in Fort Lauderdale, Florida, to serving as Director of Education at PrepMD in Braintree, Massachusetts, Tom has focused on providing real-world, practical education for clinicians. Although he has served on faculty at Broward Community College and lectures for the Heart Rhythm Society and the Food and Drug Administration, Tom has always believed that it was imperative to educate the
“front lines” of healthcare, the men and women clinicians across the country who treat patients day in and day out. He has served at Intermedics and St. Jude Medical in corporate medical device education, where he sought to make highly complicated therapies easily understood. In his tenure at both companies, he expanded training programs and developed educational materials. Finding that there was little in the way of pacemaker training for educated clinicians who just did not happen to know pacing, Tom brought his style of training to the classroom and now to book form. Tom is a native New Yorker who currently divides his time between Massachusetts and Texas. He has five children.
