DESCRIPTION

Designed to be carried in the field, this pocket-sized how-to book is a practical guide to basic techniques in mapping geological structures. In addition to including the latest computerised developments, the author provides succinct information on drawing cross-sections and preparing and presenting 'fair copy' maps and geological diagrams. Contains a brief chapter on the essentials of report writing and discusses how to keep adequate field notebooks. A checklist of equipment needed in the field can be found in the appendices.

Quote from 3rd edition

"provides a wealth of good advice on how to measure, record and write reports of geological field observations"  The Naturalist

ABOUT THE AUTHOR
