DESCRIPTION

Providing outstanding breadth of coverage in evo-devo, *Advances in Evolutionary Developmental Biology* provides a comprehensive review of the milestones of research in evolution and development and outlines the exciting research agenda for the field going forward. Compiling the viewpoints of a diverse group of field experts, this timely text expands the now-mature science of evo-devo into more complex areas of research. This essential reference is destined to become the go-to source for ideas and hypotheses for a new generation of graduate students in evolutionary and developmental biology.

ABOUT THE AUTHOR

Dr. J. Todd Streelman holds the G. Norman Bisanar chair in the School of Biology, Georgia Institute of Technology, with a cross appointment to the Petit Institute of Bioengineering and Bioscience at GIT. With a strong track record of NIH and NSF funding, Dr. Streelman is author of numerous peer-reviewed papers and holds a patent for an innovative method of identifying fast-growing fish.
