Bioanalysis of Pharmaceuticals: Sample Preparation, Separation Techniques and Mass Spectrometry

Steen Honoré Hansen (Editor), Stig Pedersen-Bjergaard (Editor)

DESCRIPTION

Bioanalysis of Pharmaceuticals: Sample Preparation, Separation Techniques and Mass Spectrometry is the first student textbook on the separation science and mass spectrometry of pharmaceuticals present in biological fluids with an educational presentation of the principles, concepts and applications. It discusses the chemical structures and properties of low- and high-molecular drug substances; the different types of biological samples and fluids that are used; how to prepare the samples by extraction, and how to perform the appropriate analytical measurements by chromatographic and mass spectrometric methods.

Bioanalysis of Pharmaceuticals: Sample Preparation, Separation Techniques and Mass Spectrometry:

• Is an introductory student textbook discussing the different principles and concepts clearly and comprehensively, with many relevant and educational examples
• Focuses on substances that are administered as human drugs, including low-molecular drug substances, peptides, and proteins
• Presents both the basic principles that are regularly taught in universities, along with the practical use of bioanalysis as carried out by researchers in the pharmaceutical industry and in hospital laboratories
• Is aimed at undergraduate students, scientists, technicians and researchers in industry working in the areas of pharmaceutical analyses, biopharmaceutical analyses, biological and life sciences
The book includes multiple examples to illustrate the theory and application, with many practical aspects including calculations, thus helping the student to learn how to convert the data recorded by instruments into the real concentration of the drug substances within the biological sample.

~ ABOUT THE AUTHOR ~

**Steen Honoré Hansen**

*Department of Pharmacy, Faculty of Health and Medical Sciences, Copenhagen University, Denmark*

**Stig Pedersen-Bjergaard**

*School of Pharmacy, University of Oslo, Norway, and Department of Pharmacy, Faculty of Health and Medical Sciences, Copenhagen University, Denmark*
