DESCRIPTION

Available to healthcare professionals for the first time, this book contains proven screening tests to measure neuromotor immaturity in children and adults in order to provide a basis for referral and help.

- Allows practitioners to screen for disorders of movement that can negatively affect educational performance and emotional function in children and adolescents
- Assesses instances where disorders of movement in adults are affecting thoughts and behavior, as in panic disorder
- Provides a novel approach for health care professionals observing aberrant reflexes in the absence of more serious pathology
- Includes reproducible scoring and observation sheets for practice and serves as the perfect complement to *Assessing Neuromotor Readiness for Learning*

ABOUT THE AUTHOR

*Sally Goddard Blythe* is International Director of The Institute for Neuro-Physiological Psychology (INPP) in Chester, UK.

She is the author of seven books on child development, including *Assessing Neuromotor Readiness for Learning: The INPP*
