**DESCRIPTION**

Edited by an expert multidisciplinary team, *Neuromodulation in Psychiatry* is the first reference guide to address both invasive and non-invasive neuromodulation strategies used in psychiatry.

- Covers basic principles, technical aspects, clinical applications and ethical considerations
- Presents up-to-date evidence in comprehensive summaries suitable for all levels of experience
- Each technique is clearly explained along with its implications for real-world clinical practice
- Allows psychiatrists to make informed decisions regarding neuromodulation for their patients
