DESCRIPTION

Describes Information Hiding in communication networks, and highlights their important issues, challenges, trends, and applications.

- Highlights development trends and potential future directions of Information Hiding
- Introduces a new classification and taxonomy for modern data hiding techniques
- Presents different types of network steganography mechanisms
- Introduces several example applications of information hiding in communication networks including some recent covert communication techniques in popular Internet services

ABOUT THE AUTHOR

Wojciech Mazurczyk is an Associate Professor at the Institute of Telecommunications, Faculty of Electronics and Information Technology, Warsaw University, Poland. He is also a senior member of IEEE.

Steffen Wendzel is Head of Secure Building Automation at the Fraunhofer Institute for Communication, Information Processing, and Ergonomics (FKIE) in Bonn, Germany.
Sebastian Zander is a Lecturer at the School of Engineering and Information Technology, Murdoch University, Australia.

Amir Houmansadr is an Assistant Professor within the College of Information and Computer Sciences at the University of Massachusetts Amherst.

Krzysztof Szczypiorski is a Professor of Telecommunications at the Institute of Telecommunications, Faculty of Electronics and Information Technology at Warsaw University of Technology, Poland.
