DESCRIPTION

Pancreatitis: medical and surgical management provides gastroenterologists and GI surgeons, both fully qualified and in training, with a focused, evidence-based approach to the most exciting developments in the diagnosis and clinical management of pancreatitis.

Focusing mainly on the rapidly changing and innovative medical and surgical strategies to manage the disease, new surgical procedures such as endoscopic biliary intervention and minimally invasive necrosectomy to exciting new medical therapies like Antiprotease, Lexipafant, probiotics and enzyme treatment are all discussed.

Full colour throughout, with over 250 colour illustrations and with reference to the latest clinical guidelines from the AGA, ACG and UEGW at all times, it is an essential consultation tool for all those managing patients with this increasingly common condition.

ABOUT THE AUTHOR

David B. Adams, M.D. is Professor and Chief of Gastrointestinal and Laparoscopic Surgery and Co-Director of the Digestive Disease Center at the Medical University of South Carolina, Charleston, South Carolina. He is the author of over 100 manuscripts and book chapters which deal with his academic and clinical research interests in chronic pancreatitis.

Peter B. Cotton, M.D. is a British Gastroenterologist best known for his advancement in digestive disease, pioneering and naming the ERCP procedure and creating the Digestive Disease Center at the Medical University of South Carolina where he is Professor
of Medicine. He has been active in National and International organizations, and has given invited lectures and demonstrations in more than 50 countries His bibliography includes over 900 medical publications, including more than 300 original contributions in peer reviewed journals, and 10 books.

**Nicholas J. Zyromski**, M.D. is Associate Professor of Surgery at Indiana University. He served as an NIH research fellow at the Mayo Clinic in Rochester, Minnesota, and is currently the Indiana University HPB Surgery Fellowship Program Director. Dr. Zyromski’s principal clinical interest is in pancreatic disease; his basic and translational research interest focuses on the inflammatory response of acute pancreatitis as well as the influence of obesity and adipose tissue on pancreatic diseases — pancreatic cancer and acute pancreatitis.

**John Windsor**, M.D. holds a personal chair in surgery at the University of New Zealand, Auckland. He is Director of Surgical Research, Director of Surgical Research Network, Co-Director of Applied Surgery and Metabolism Laboratory and Surgical Centre for Outcomes Research and Evaluation, Principle Investigator Pancreas Research Group, and Associate Investigator Maurice Wilkins Centre of Biodiscovery. His primary research is in the pathophysiology and clinical management of acute and chronic pancreatitis. He is Associate Editor of the journal *Panreatology* and the *World Journal of Surgery*.
