Atmospheric Chemistry and Physics: From Air Pollution to Climate Change, 3rd Edition
John H. Seinfeld, Spyros N. Pandis

Hardcover ISBN: 978-1-118-94740-1 April 2016 $156.00

DESCRIPTION

Expanded and updated with new findings and new features

• New chapter on Global Climate providing a self-contained treatment of climate forcing, feedbacks, and climate sensitivity

• New chapter on Atmospheric Organic Aerosols and new treatment of the statistical method of Positive Matrix Factorization

• Updated treatments of physical meteorology, atmospheric nucleation, aerosol-cloud relationships, chemistry of biogenic hydrocarbons

• Each topic developed from the fundamental science to the point of application to real-world problems

• New problems at an introductory level to aid in classroom teaching

ABOUT THE AUTHOR

John H. Seinfeld is Louis E. Nohl Professor at the California Institute of Technology. He is a member of the U.S. National Academy of Engineering, the U.S. National Academy of Sciences, and a Fellow of the American Academy of Arts and Sciences. He is the recipient of numerous honors and awards, including the American Chemical Society Award for Creative Advances in Environmental Science and Technology, the NASA Public Service Award, the Nevada Medal, the Fuchs Award, and the 2012 Tyler Prize.
Spyros N. Pandis is Professor of Chemical Engineering at the University of Patras, Greece, and Research Professor of Chemical Engineering and Engineering and Public Policy at Carnegie Mellon University. He is the recipient of the Whitby Award by the American Association for Aerosol Research and the European Research Council Advanced Investigator IDEAS award. He is a Fellow of the American Association for Aerosol Research.
