DESCRIPTION

- 26 real-life cases illustrate the applications of basic immunology in clinical settings
- May be utilized alone or as a companion to *Immunology: A Short Course, 7th Edition* by Richard Coico and Geofftry Sunshine (ISBN 9781118396919)
- Each case study is introduced by clearly written descriptions of the major immunological disorders
- Full colour photographs and illustrations complement complete presentation of real data
- Includes complete set of problems and discussion questions for each chapter

ABOUT THE AUTHOR

**Warren Strober**, M.D., is Section Chief in the Laboratory of Clinical Investigation, Mucosal Immunity Section at the National Institute of Allergy and Infectious Diseases, National Institutes of Health.

**Susan R.S. Gottesman**, M.D., Ph.D., is Associate Professor in the Department of Pathology at SUNY Health Science Center at Brooklyn.
FEATURES

• Twenty-six case studies that cover topics including immunodeficiency diseases, immediate hyper-sensitivity and mast cell disorders, autoimmune disorders, and malignancies of the lymphoid system

• Full-color photographs and illustrations that complement the case studies

• Each section begins with an introductory chapter that teaches students about the subject area in that section, how to approach and use the material in the cases, and how to get the most out of the material for research, clinical application, and further study

• A complete set of problems and discussion questions for each chapter
