DESCRIPTION

The 13th Edition of Cervone's Personality: Theory and Research significantly updates and expands on previous editions of this classic text. New to this edition, Personality and the Brain coverage throughout the text shows readers how cutting-edge advances in neuroscience inform all aspects of personality theory and research. Cervone and Pervin, 13th edition provides uniquely up-to-date coverage of contemporary personality science while continuing to ground the student in the field's classic, and contemporary, theoretical statements.

NEW TO EDITION

- Coverage of self-determination in Chapter 6 Rogers’s *Phenomenological Theory: Applications, Related Theoretical Conceptions, and Contemporary Research* has been significantly re-worked and expanded.

- The discussion of the Five-Factor Model in Chapter 8 *Trait Theory: The Five-Factor Model; Applications and Evaluation of Trait Approaches to Personality* has been updated.

- The presentation of Social Cognitive Theory in Chapter 12 *Social-Cognitive Theory: Bandura and Mischel* and Chapter 13 *Social-Cognitive Theory: Applications, Related Theoretical Conceptions, and Contemporary Research* has been revised with new material.

- Throughout the text has been streamlined to aid in students focus and understanding.

FEATURES

- Integrates theory and research to demonstrate to the student how the two impact one another.

- Integrates case material with theory to bridge the gap between the general and specific. Enables students interested in clinical psychology to see links between personality psych and clinical practice.

- Provides a basis for comparison of theories allowing students to make their own judgements concerning the merits of each.

- Presents complex scientific theories in an accessible manner.
