DESCRIPTION

Retaining the successful previous editions' programmed instructional format, this book improves and updates an authoritative textbook to keep pace with compounding trends and calculations – addressing real-world calculations pharmacists perform and allowing students to learn at their own pace through examples.

• Connects well with the current emphasis on self-paced and active learning in pharmacy schools

• Adds a new chapter dedicated to practical calculations used in contemporary compounding, new appendices, and solutions and answers for all problems

• Maintains value for teaching pharmacy students the principles while also serving as a reference for review by students in preparation for licensure exams

• Rearranges chapters and rewrites topics of the previous edition, making its content ideal to be used as the primary textbook in a typical dosage calculations course for any health care professional

• Reviews of the prior edition: "...a well-structured approach to the topic..." (Drug Development and Industrial Pharmacy) and "...a perfectly organized manual that serves as a expert guide..." (Electric Review)
ABOUT THE AUTHOR

Maria Glaucia Teixeira, PhD, is Associate Professor Emeritus in the School of Pharmacy at the University of Wyoming, where she retired after 23 years on the faculty, following 10 years as Professor at the Federal University of Ceará in Fortaleza, Brazil. She has received numerous recognitions for her teaching, including the Top Prof and Excellence in Teaching awards at Wyoming. She received her PhD in Pharmacology at Paul Sabatier University, Toulouse, France.

Joel L. Zatz, PhD, is Professor Emeritus at Rutgers University, New Jersey.
