Highly Commended in Internal medicine in the 2017 BMA Medical Book Awards

Highly illustrated, comprehensive, and accessible, *Ophthalmology Lecture Notes* is the ideal reference and revision guide to common eye problems and their diagnosis and management. Beginning with overviews of anatomy, history taking, and examination, it then covers a range of core ophthalmic conditions, including a new chapter on paediatric ophthalmology. The content has been thoroughly updated and includes:

- Over 200 diagrams and photographs

- A range of core clinical cases in chapter 20 demonstrating the clinical context of key conditions

- Learning objectives and summary of key points in each chapter

*Ophthalmology Lecture Notes* is perfect for developing knowledge for clinical practice or revision in the run-up to examinations, and uses a systematic approach to provide medical students and junior doctors with all the tools they need to manage clinical situations. It is also useful for optometrists in training, helping them develop a sound understanding of clinical ophthalmology.
