DESCRIPTION

*Microbiology: Principles and Explorations* is an introductory product that has successfully educated thousands of students on the beginning principles of Microbiology. Using a student-friendly approach, this product carefully guides students through all of the basics and prepares them for more advanced studies.

ABOUT THE AUTHOR

*Jacqueline G. Black* is Professor Emeritus of Microbiology at Marymount University in Arlington, Virginia. Dr. Black recently retired after 40+ years of teaching Microbiology in Higher Education.
NEW TO EDITION

- **A New Section on Microbiomes**: Microbiomes is a current hot topic in microbiology. This new section lays the foundation for deeper discussions later in the course.

- **Additional Content Updates**: New CDC data, updated and improved photographs, and streamlined content have been added to the course.

FEATURES

- **Opening Vignettes**: Two-page vignettes at the beginning of each course section engage students with the concepts to be covered by drawing a connection between the learning objectives of the section and hot issues in the field as well as applications and factoids of high interest.

- **Microbiology Roadmap**: Found at the end of each course section are “roadmaps” that serve as study guides highlighting the key concepts students should be understanding and comprehending.
