You can reduce the risk of your patients suffering an osteoporosis-related fracture.

Osteoporosis is a highly prevalent, treatable disease, but it is currently incurable. Successful early diagnosis can lead to effective treatment strategies that reduce the risk of a patient’s life being compromised by serious fracture injury.

In *Osteoporosis*, Dr Dale Stovall has assembled world-leading experts who guide you through modern best-practice approaches to:

- Diagnosis of osteoporosis
- Risk assessment for fractures
- Use of calcium and vitamin D
- Medical therapy and follow up
• Future approaches to treatment

Osteoporosis empowers you to identify and treat your patients with osteoporosis and low bone mass, preventing subsequent fractures and improving their quality of life.
