**DESCRIPTION**

While bringing into focus the major advances in cardiac pacing over the last 5-6 years this book places particular emphasis on new techniques for the treatment of congestive heart failure. Other topics include new and unusual indications for pacemakers, the clinical aspects of expanding pacemaker memory and stored electrograms in the diagnosis of arrhythmias, automatic mode switching, the pacemaker/ICD interface, complex pacemaker electrocardiography and advances in pacemaker follow-up. This book will be a valuable resource for those involved in the care of patients with implanted devices.

**ABOUT THE AUTHOR**

Dr. S. Serge Barold, MB, BS, FRACP, FACC. Cardiology Division, Department of Medicine, Rochester General Hospital and University of Rochester School of Medicine and Dentistry

Dr. Jacques Mugica, MD. Chairman, Cardiostim

**FEATURES**

-
• brings into focus the major advances in cardiac pacing in the last 5-6 years.

• Emphasis on new techniques for the treatment of congestive heart failure.

• Controversial indications for pacing are included especially atrial fibrillation.

• The interface of pacemaker and defibrillator is discussed to highlight the new field of pacing by ICDs which is quite different from conventional pacing.

• The book should be valuable to all involved with the care of patients with implanted devices.
