In this book, Professor Christopher Coker presents an original and controversial thesis about the future of war.

- Argues that the biotechnology revolution has given war a new lease of life.
- Draws on thinkers from Hegel and Nietzsche to the postmodernists.
- Refers to modern fiction and films.
- Part of the prestigious Blackwell Manifestos series.
Christopher Coker is Professor of International Relations at the London School of Economics and Political Science. He is the author of many books, including *Waging War without Warriors* (2002) and *Humane Warfare* (2001). He lectures regularly at Military Staff Colleges around the world.
