DESCRIPTION

This book is focused on the use of non-invasive imaging in clinical cardiology. Its central theme is the use of different imaging modalities in the routine clinical problems that physicians encounter on a regular basis. Many different clinical issues are discussed, including valvular disease, coronary artery disease, and myocardial and pericardial disease. In these various pathologies, the applications of echocardiography, nuclear imaging, CMR and MSCT are highlighted.

The majority of chapters are illustrated with a clinical case study and with moving images, which are contained on the accompanying CD. These case studies offer excellent examples of how to use the imaging modalities in clinical cardiology. Contributors are from Europe, the US and Asia to provide a global perspective.

The ESC Education Series

This book with its supporting CD is part of the ESC Education Series. The series is designed to provide medical professionals with the latest information about the understanding, diagnosis and management of cardiovascular diseases. Where available, management recommendations are based on the established European Guidelines, which encompass the best techniques to use with each cardiac disease. Throughout the series, the leading international opinion leaders have been chosen to edit and contribute to the books. The information is presented in a succinct and accessible format with a clinical focus.
ABOUT THE AUTHOR

Jeroen Bax
Department of Cardiology, Leiden University Medical Center, Leiden, The Netherlands
Specialism: Nuclear Cardiology

Christopher Kramer
University of Virginia Health System, Department of Radiology and Medicine, Charlottesville, VA, USA
Specialism: Cardiac MRI

Thomas H. Marwick
Professor of Medicine and Head of Section, University of Queensland, Brisbane, Australia
Specialism: Echocardiology

William Wijns
Cardiovascular Centre, Onze-Lieve-Vrouw Ziekenhuis, Aalst, Belgium
Specialism: General Imaging

FEATURES

How and when to implement different imaging modalities

• Part of the ESC Education Series

• Edited by leading international opinion leaders

• Succinct and accessible format with a clinical focus
• Provides insight into the use of the different imaging modalities

• Includes clinical cases and an accompanying CD of moving images

SERIES

European Society of Cardiology
