Chest Pain: Advanced Assessment and Management Skills
John Albarran (Editor), Jenny Tagney (Editor)

DESCRIPTION

*Chest Pain: Advanced Assessment and Management* promotes a systematic approach to the assessment and management of patients presenting with chest pain and related undifferentiated symptoms. Specifically, it equips practitioners with the knowledge and clinical skills needed to effectively differentiate and respond to clinical presentations where the primary symptom for seeking healthcare advice involves chest pain.

Introductory chapters in section one explore the principles of physical assessment, history taking and differential diagnosis to provide the framework for subsequent chapters, which explore cardiac and non-cardiac causes of chest pain.

Section two examines the advanced assessment and overall management of patients with pain in the chest. A range of clinical conditions that trigger chest pain and other related symptoms are covered, including: angina, acute coronary syndromes, pericarditis and myocarditis, aortic dissection, pulmonary embolism, oesophago-gastric disorders, musculoskeletal causes, pulmonary and respiratory causes, coronary heart disease, myocardial infarction, chest pain caused by trauma or cardiac syndrome X, cocaine misuse and Herpes zoster.
ABOUT THE AUTHOR

John W. Albarran is Principal Lecturer in Critical Care, University of the West of England, and Jenny Tagney is Cardiology Nurse Consultant, United Bristol Healthcare Trust

FEATURES

* Concise, accessible guide to assessment and management of chest pain for health professionals
* Addresses cardiac and non-cardiac causes of chest pain
* All chapters are informed and underpinned by an extensive evidence base.
* Adopts a systematic approach to assessment and application of evidence-based interventions
* Emphasis on developing competent, safe practice in modern healthcare practice
* Relevant to a wide range of practitioners, either based in the acute or community sector
