DESCRIPTION

By considering three case study regions in Mexico during the Colonial era, Climate and Society in Colonial Mexico: A Study in Vulnerability examines the complex interrelationship between climate and society and its contemporary implications.

• Provides unique insights on climate and society by capitalizing on Mexico’s rich colonial archives

• Offers a unique approach by combining geographical and historic perspectives in order to comprehend contemporary concerns over climate change

• Considers three case study regions in Mexico with very different cultural, economic, and environmental characteristics

ABOUT THE AUTHOR

Georgina H. Endfield is a Reader in Environmental History in the School of Geography at the University of Nottingham. She has published papers in a wide variety of journals, including the Annals of the Association of American Geographers and the Transactions of the Institute of British Geographers, and is winner of a Philip Leverhulme Prize. She is editor of the journal Environment and History.
