DESCRIPTION

This classic manual on structural steel design provides a major source of reference for structural engineers and fabricators working with the leading construction material. Based fully on the concepts of limit state design, the manual has been revised to take account of the 2000 revisions to BS 5950. It also looks at new developments in structural steel, environmental issues and outlines the main requirements of the Eurocode on structural steel.

ABOUT THE AUTHOR

FEATURES

* first time in paperback - hardback £89.50 (published February 2003)

* packed full of tables, analytical design information and worked examples
* latest edition features new developments in structural steel, environmental issues, and Eurocode on structural steel

* contributors number leading academics, consulting engineers and fabricators

* 'a must for anyone involved in steel design' - Journal of Constructional Steel Research
