**DESCRIPTION**

Based on the most up-to-date research, *Child Neuropsychology* is a thorough and accessible guide to the key concepts and basic processes central to neuropsychological assessment and child evaluation. Essays by leading experts in the field cover basic neuropsychological functions and related disorders in the context of brain development.

Divided into three parts, the text begins with clear definitions of the concepts and methodology of brain development in child neuropsychology. Part two examines normal and abnormal functional development. The final part considers professional practice and provides valuable insights into the special problems of neuropsychological assessment of infants and children in clinical and educational settings.

**ABOUT THE AUTHOR**

**Jonathan Reed** is a clinical psychologist in private practice specializing in child neuropsychology. He is a director and co-founder of a community child neuropsychology rehabilitation service, Recolo UK Ltd. He has worked as a child neuropsychologist at Guy’s Hospital, London and at the Royal London Hospital.

**Jody Warner-Rogers** trained at West Virginia University. She is a consultant clinical psychologist and pediatric neuropsychologist with the Paediatric Neurodisability Service at Guy’s and St Thomas’s NHS Foundation Trust.
