**DESCRIPTION**

Evidence based practice is now widely accepted as a fundamental tenet of midwifery. The importance of evidence in defining midwifery policy and practice in the UK health system, and others, is acknowledged and enduring. While the development and evaluation of research in midwifery is well charted, the question of how such evidence is incorporated into practice has, to date, received less attention and discussion in the midwifery profession. Answering this need, Evidence Based Midwifery focuses on the dissemination and use of evidence for midwifery practice, and explores midwives’ experiences in using the evidence base to inform policy and enhance clinical practice.

Written by a highly-regarded and diverse group from the UK and international midwifery community, Evidence Based Midwifery addresses issues of relevance to all midwives whether clinical practitioners or educators, students or supervisors, researchers or managers. Issues that influence evidence based midwifery are discussed, and topics covered include problem based learning, implementation of evidence based guidelines and the involvement of service users.

- Edited by founder members of the Evidence Based Midwifery Network
- International collaboration with contributions from the UK, Greece, Canada and the Netherlands
Primary focus on the incorporation of evidence into midwifery practice

- Real-life examples throughout

---

**ABOUT THE AUTHOR**

Helen Spiby is Senior Lecturer in Midwifery at York University. She co-chairs the national Evidence Based Midwifery Network (EBMN)

Jane Munro is a Research & Development Midwife at Sheffield Teaching Hospitals NHS Trust

---

**FEATURES**

- Edited by the founder members and co-chairs of the Evidence Based Midwifery Network

- Case studies throughout

- Offers international perspectives on evidence-based midwifery practice

- Focuses on the use of evidence to enhance midwifery practice
