Risk assessment and management is a core element of mental health practice, and all nurses need to be aware of the risks surrounding them and their patients in order to create a safe working environment. This timely and accessible text explores how nurses can enhance their skills, and improve their practice so that risk is assessed and managed safely and effectively.

*Risk Assessment and Management in Mental Health Nursing* explores issues including context and definitions of risk, risk assessment tools and techniques, strategies for preventing risk situations, suicide, self-harm, neglect, forensic aspects of risk, substance misuse, ethical considerations, victimology, risk to others and risk to self.

**Special Features:**

- Written in the context of latest policy developments such as the National Service Frameworks
- Discusses the role of the mental health nurse in the assessment and management of risk
- Explores an increasingly important and timely subject in mental health practice
- Practical focus, with case studies throughout
