DESCRIPTION

_Palliative Nursing_ is an evidence-based practical guide for nurses working in areas of practice where general palliative care is provided. This may be in hospitals, nursing homes, dementia units, the community and any other clinical areas which are not classified as specialist palliative care.

This book first explores the history and ethos of palliative care, and then looks at palliative nursing across various care settings. It then looks at palliative nursing care for people with specific illnesses, including heart failure, dementia, chronic obstructive pulmonary disease, cancer, and neurological conditions. Palliative care for children and young people is discussed, and then the book finally looks at education and research in palliative nursing. _Palliative Nursing_ will be essential reading for all nurses working with palliative care patients in a non specialist role, i.e. in hospitals, primary care and nursing homes, as well as nursing students.

SPECIAL FEATURES

- Explores the palliative nursing issues related to specific diseases groups

- Written in the context of the new national tools, i.e. the end of life initiative, preferred place of care, Liverpool care pathway and Gold standards framework.
Each chapter includes practice points and cases to allow the practitioner to undertake guided reflection to improve practice

- Written by nurses for nurses

- Provides guidance for nurses working in all four countries of the UK

---
