DESCRIPTION

The practical manual for pediatricians and endocrinologists

Practical Endocrinology and Diabetes in Children, Second Edition, continues to provide a very practical overview of managing endocrine problems in children. Coverage of each disorder reflects its clinical importance. The material is organized in such a way that it can be referred to at a moment's notice. Helpful overviews of epidemiology, pathophysiology, investigations, differential diagnoses and psychosocial issues support the advice on management principles.

New features of this Second Edition include:

- Completely revised first chapter on diabetes
- Additional growth charts added to the appendix
- New Editor, Raymond L. Hintz, MD, Stanford University Medical Center, joins the team and brings a North American perspective to the text
- New section added to each chapter entitled ‘Potential pitfalls’ to help you avoid common problems
ABOUT THE AUTHOR

**Joseph E Raine** is a Consultant Paediatrician with a special interest in diabetes and endocrinology who works in a busy London Hospital. His interests include medical education and diabetes and he also runs the congenital hypothyroidism clinic at the Great Ormond Street Hospital for Sick Children.

**Malcolm D C Donaldson** is a Senior Lecturer in Child Health and an Honorary Consultant Endocrinologist at the Royal Hospital for Sick Children in Glasgow.

**John W Gregroy** provides a specialist service for children with endocrine disorders living in Wales. He also has an active research interest in the implications of endocrinopathy and childhood cancer on bone and body composition and the development of novel psychological interventions to support children with diabetes.

**Martin O Savage** is Professor of Paediatric Endocrinology at St Bartholomew's and the Royal London Hospitals in London, UK. He has wide clinical interests and research experience in disorders of the growth hormone - IGF-I axis and of paediatric adrenal disease, particularly Cushing's syndrome.

**Raymond L Hintz** is a Professor of Pediatrics at Stanford University specializing in pediatric endocrinology and diabetes. He is a Past President and Secretary of the Lawson Wilkins Pediatric Endocrine Society. His research has focused on growth hormone and the insulin-like growth factors.
