DESCRIPTION

"...an important text for practitioners...this text is a valuable tool that develops self-inquiry skills."
Journal of Advanced Nursing

Reflection is widely recognised as an invaluable tool in health care, providing fresh insights which enable practitioners to develop their own practice and improve the quality of their care. Guided Reflection: A Narrative Approach to Advancing Professional Practice introduces the practitioner to the concept of guided reflection, in which the practitioner is assisted by a mentor (or ‘guide’) in a process of self-enquiry, development, and learning through reflection in order to effectively realise one’s vision of practice and self as a lived reality.

Guided reflection is grounded in individual practice, and can provide deeply meaningful insights into self-development and professional care. The process results in a reflexive narrative, which highlights key issues for enhancing healthcare practice and professional care. Reflection: A Narrative Approach to Advancing Professional Practice uses a collection of such narratives from everyday clinical practice to demonstrate the theory and practicalities of guided reflection and narrative construction. In this second edition, Chris Johns has explored many of the existing narratives in more depth. Many new contributions have been added including several more innovative reflections, such as performance and art. These narratives portray the values inherent in caring, highlight key issues in clinical practice, reveal the factors that constrain the quest to realise practice, and examine the ways practitioners work towards overcoming these constraints.
ABOUT THE AUTHOR

Chris Johns is Reader in Advanced Nursing Practice at the University of Bedfordshire and is 'one of the leading proponents of reflective theory' (Nursing Times, 2000). He has authored and edited several books in reflective practice for Wiley-Blackwell including Becoming a Reflective Practitioner, Transforming Nursing through Reflective Practice, and Engaging Reflection in Practice.

FEATURES

• Enables practitioners to use guided reflection to develop effective healthcare practice and facilitate improvements in practice and care

• Provides guidelines for developing guided reflection as an effective tool

• Written by one of the leading proponents of reflective theory

• Includes a new set of narratives from nurses working in collaborative research

• Pioneers an innovative approach to reflexive narrative research
