DESCRIPTION

The third edition of Traumatic Dental Injuries: A Manual builds on the widespread success of the previous two editions. The ultimate guide to dental trauma, the manual preserves its uniquely usable and reader-friendly format, demonstrating step-by-step treatment protocols for commonly occurring traumatic injuries. Several new sections have been added to expand the number of clinical scenarios, describing soft tissue injuries associated with dental trauma, showing how decoronation of ankylosed anterior teeth in adolescents can preserve the alveolar process for later implant placement, and identifying predictors for pulpal and periodontal ligament healing complications as well as for tooth loss.

A unique feature of the new edition is the accompanying DVD which presents computer animations of all trauma scenarios, as well as links to the internet-based interactive Dental Trauma Guide to predict healing complication for individual trauma scenarios.

This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.
