The needs of critically ill children are unique and highly specialized. *Paediatric Intensive Care Nursing* is an essential manual of care and an invaluable resource to all those involved in the care of critically ill children and young people. Covering all the key aspects of pediatric intensive care, it is a fully comprehensive textbook which provides an evidence-based and up-to-date guide for all nurses who work with critically ill children.

*Paediatric Intensive Care Nursing* is divided into four user-friendly sections:

- The first section looks at the general background of paediatric intensive care

- Section two employs a systems approach, with each chapter focusing on a specific disease and following the same framework. This includes treating children with cardiac conditions, acute neurological dysfunction, musculoskeletal injuries and gastrointestinal and endocrine conditions

- Section three looks at the essential care of managing pain relief, transportation needs and treating wounds

- The final section explores the holistic aspects of nursing - nutrition and fluid management, infection control issues, safeguarding children and spirituality and bereavement

Written by a team of experts in the field, *Paediatric Intensive Care Nursing* is indispensable reading for nurses and health care professionals working with critically ill children.
ABOUT THE AUTHOR

Michaela Dixon is Senior Lecturer in Child Health at UWE and Clinical Development Nurse, Paediatric Intensive Care at Bristol Royal Hospital for Children.
