**DESCRIPTION**

*Evidence-based Dermatology, Second Edition* is a unique book in the field of clinical dermatology. Written and edited by some of the world’s leading experts in evidence-based dermatology, it takes a highly evidence-based approach to the treatment of all major and many of the less common skin conditions.

The toolbox at the beginning of the book explaining how to critically appraise different studies, along with the comprehensive reviewing and appraisal of evidence in the clinical chapters makes this book distinctive in its field as do the treatment recommendations which are based on the discussion of the best available evidence using a question-driven approach and a common structure on dealing with efficacy, drawbacks and implications for clinical practice.

---

**ABOUT THE AUTHOR**

Hywel Williams

Professor of Dermato-Epidemiology, Nottingham UK. Professor Williams is coordinating editor of the Cochrane Skin Group. He is also the dermatology adviser for Clinical Evidence (BMJ Publishing Group) which is distributed to 500 000 doctors in the US, available free to NHS institutions in the UK and is translated into 10 languages.

Michael Bigby
Assistant Professor of Dermatology, Harvard University Medical School and Chief of Dermatology, Harvard University Health Service. His chief teaching interest is in evidence-based dermatology. He edited a special issue of the Archives in Dermatology devoted to ebd, which has resulted in a quarterly ebd section to which he is a continuing contributor, and he has presented papers and chaired sessions on ebd at the AAD. He has played a major part in introducing the concept in the USA.

**Thomas Diepgen**
Professor of Dermatology, University of Heidelberg, Germany is a member of European Dermato-epidemiology network and a specialist in contact dermatitis, and occupationally and environmentally acquired conditions.

**Andrew Herxheimer**
Cochrane UK Center is a founding member of the Cochrane Collaboration and now a editor of the Consumer and Communications Group. He is part of the Consumer Network and the Adverse Effects Methods subgroup and also works with the Cochrane skin group.

**Luigi Naldi**
Consultant Dermatologist at Ospedale Riunit Bergamo, Italy and a member of European Dermato-epidemiology network. He specialises in psoriasis.

**Berthold Rzany**
C3-Professor for Evidence Based Medicine in Dermatology, Head of the division of Evidence Based Medicine at the department of dermatology at the Humboldt-University in Berlin. His research topics include aesthetic medicine, e.g. botulinum toxin A, collagen, hyaluronic acid, polyactic acid & other injectables, middle depth peelings as well as hyperhidrosis.
