A practical reference to the medical and surgical treatment of epilepsy

The third edition of *The Treatment of Epilepsy* has been thoroughly updated. It is a reference work, but has a strong practical bias, and is designed to assist neurologists, neurosurgeons and other clinicians at all levels who are involved in the treatment of patients with epilepsy. It is a definitive source of clinical information to guide clinical practice and rational therapy.

Written and edited by leading experts, many actively involved with the International League Against Epilepsy, this new edition:

- covers the recent advances in the principles and approaches to epilepsy therapy, the introduction of new drugs and the development of new surgical techniques

- contains 26 completely new chapters and 61 new contributors

- includes pharmacological properties and prescribing information for all drugs used in the treatment of epilepsy

- features the important contribution of a new editor Jerome Engel Jr, Professor of Neurology at the University of California School of Medicine in Los Angeles.
About the Author

Professor Simon Shorvon, Institute of Neurology, Queen's Square, London, UK

Professor Emilio Perucca, University of Pavia, Italy

Professor Jerome 'Pete' Engel, University of California at Los Angeles, USA
