DESCRIPTION

The new edition of this established and highly respected text is THE definitive reference in its field. It details methods for the elimination or prevention/control of microbial growth, and features:

- New chapters on bioterrorism and community healthcare
- New chapters on microbicide regulations in the EU, USA and Canada
- Latest material on microbial resistance to microbicides
- Updated material on new and emerging technologies, focusing on special problems in hospitals, dentistry and pharmaceutical practice
- Practical advice on problems of disinfection and antiseptics in healthcare
- A systematic review of sterilization methods, with uses and advantages outlined for each
- Evaluation of disinfectants and their mechanisms of action with respect to current regulations

The differences between European and North American regulations are highlighted throughout, making this a truly global work, ideal for worldwide healthcare professionals working in infectious diseases and infection control.
ABOUT THE AUTHOR

Peter A. Lambert is Professor of Microbiology in the School of Life and Health Sciences at Aston University.

Jean-Yves Maillard, Cardiff School of Pharmacy and Pharmaceutical Sciences, Cardiff University.
