DESCRIPTION

This international bestselling book on acute paediatric care is the coursebook for the Advanced Life Support Group’s Advanced Paediatric Life Support (APLS). It uses their practical approach, a tried and tested method of treating children during the crucial first few hours of a life threatening condition. Advanced Paediatric Life Support is used in emergency and paediatric departments, by physicians, nurses and allied health professionals, and its clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency.

The fifth edition includes major new features bringing it right up to date, including:

• The latest International Liaison Committee on Resuscitation (ILCOR) 2010 Guidelines

• A discussion on the importance of human factors

• A new and improved design including full colour photographs and diagrams

With this book at hand, paediatric and emergency staff can be confident in having comprehensive and authoritative guidance on the first principles of recognising life threatening conditions through to all the procedures necessary to save a child's life.
ABOUT THE AUTHOR

The Advanced Life Support Group (ALSG), Manchester UK, began life in 1990 and became a registered medical education charity in 1993. The organisation exists to "preserve life by providing training and education to the general public and in particular but not exclusively to doctors, nurses and other members of the medical profession, in life saving techniques". The book is written and edited by Emergency Medicine specialists who are Advanced Life Support Group (ALSG) trainers.
