DESCRIPTION

This book covers a wide range of topics that address the main areas of interest to scientists, engineers, and students concerned with the synthesis, characterization and applications of nanomaterials. Development techniques, properties, and examples of industrial applications are all widely represented as they apply to various nanostructured materials including nanocomposites and multilayered nanometric coatings. It is recommended to anyone working in the field of nanomaterials, especially in connection with the functionalization and engineering of surfaces.

ABOUT THE AUTHOR

Professor Jamal Takadoum is Deputy Director of the Micro Nano Sciences & Systems department of FEMTO-ST Institute and Professor of Materials Science at the National Engineering Graduate School of Mechanics and Microtechnologies of Besançon (ENSMM) in France.
