### DESCRIPTION

A unique overview of the manufacture of and applications for materials nanoarchitectonics, placing otherwise hard-to-find information in context.

Edited by highly respected researchers from the most renowned materials science institute in Japan, the first part of this volume focuses on the fabrication and characterization of zero to three-dimensional nanomaterials, while the second part presents already existing as well as emerging applications in physics, chemistry, biology, and biomedicine.

### ABOUT THE AUTHOR

**Dr. Katsuhiko Ariga** is the Director of Supermolecules Unit and Principal Investigator of World Premier International (WPI) Research Center for Materials Nanoarchitectonics (MANA), the National Institute for Materials Science (NIMS), Japan. He received his B.Eng., M.Eng., and Ph.D. degrees from the Tokyo Institute of Technology (TIT). He was Assistant Professor at TIT, worked as a postdoctoral fellow at the University of Texas at Austin, USA, and then served as a group leader in the Supermolecules Project at Japan Science and Technology Agency (JST). Thereafter, Dr. Ariga worked as Associate Professor at the Nara Institute of Science and Technology, and then became involved with the ERATO Nanospace.
Dr. Mitsuhiro Ebara is Principal Investigator in the Mechanobiology Group at the National Institute for Materials Science (NIMS), Japan.
