Detection of Highly Dangerous Pathogens: Microarray Methods for BSL 3 and BSL 4 Agents
Tanja Kostic (Editor), Patrick Butaye (Editor), Jacques Schrenzel (Editor)

O-Book ISBN: 978-3-527-62668-7 October 2009 Available on Wiley Online Library

DESCRIPTION

Written by leading experts in the field as part of an interdisciplinary pan-European research program funded by the EU, the results provided in this booklet provide a unique and comprehensive overview of how microarray technology can be used in safely tracking the most highly dangerous pathogens. A must-have for public health agencies focused on bioterrorism as well as all laboratories working with BSL3 and/or BSL 4 agents.

ABOUT THE AUTHOR

Tania Kostic is a researcher in the Department of Bioresources/Microbiology at the Austrian Research Centers at Seibersdorf working on microbial diagnostic microarrays.

Patrick Butaye is a veterinary researcher at the Veterinary and Agrochemical Research Center in Brussels with a focus on antimicrobial resistance in bacteria from animal origin.

Jacques Schrenzel is a physician and microbiologist, heading the central bacteriological laboratory of the Hôpitaux Universitaires de Genève. He is also a consultant for infectious diseases and is in charge of the genome research laboratory.
