**DESCRIPTION**

*Introduction to the Human Body 10th Edition* offers a balanced introduction to the human body, especially developed to meet the needs of the one-semester A&P course. It provides an effective blend of stunning art and clearly written text to illuminate the complexities of the human body. Class-tested pedagogy is woven into the narrative and illustrations to ensure that students gain a solid understanding of the material.

**ABOUT THE AUTHOR**

Gerard J. Tortora is Professor of Biology at Bergen Community College in Paramus, New Jersey. He teaches human anatomy and physiology as well as microbiology. He received his bachelor's degree in biology from Fairleigh Dickinson University and his master's degree in science education from Montclair State College. He is active in professional organizations such as the Human Anatomy and Physiology Society, the American Society of Microbiology, American Association for the Advancement of Science, National Education Association, and the Metropolitan Association of College and University Biologists.
Bryan Derrickson is Professor of Biology at Valencia Community College in Orlando, Florida, where he teaches human anatomy and physiology. He received his bachelor's degree in biology from Morehouse College and his Ph.D. in Cell Biology from Duke University. He is a member of the Human Anatomy and Physiology Society and the National Association of Biology Teachers.

NEW TO EDITION

New to the Text:

• Content has been updated throughout, with new or heavily revised sections on buffers and disease, cryolipolysis, epiphyseal plate, and control of breathing.

• New or revised art and photos have been added to most chapters.

• Clinical Connections are new or updated throughout the text.

• Heart illustrations in chapter 15 are all new.

• Anatomical terminology has been updated throughout the text.

New in WileyPLUS Learning Space:

• NEW 3-D physiological animations have been added to the WileyPLUS Learning Space course.

• Three NEW lab simulations have been added to PowerPhys.

• Real Anatomy 2.0 and PowerPhys 3.0 are now integrated into WileyPLUS Learning Space and supported on tablets.
FEATURES

WileyPLUS Learning Space is an easy way for students to learn, collaborate, and grow. With WileyPLUS Learning Space, students create a personalized study plan, assess progress along the way, and make deeper connections as they interact with the course material and each other.

WileyPLUS Learning Space also includes ORION—integrated, adaptive practice that helps students build their proficiency on topics and use their study time most effectively.

This collaborative learning environment provides immediate insight into strengths and problem areas through a combination of dynamic course materials and visual reports so that both you and your students can act on what’s most important.

Real Anatomy 2.0 is web-based 3-D imaging software that allows students to dissect through over 40 layers of a real human body to study the anatomical structures of all body systems. The software is web-based and integrated in WileyPLUS Learning Space along with worksheets and questions designed to optimize student use.
