Discovery-Based Experience in the Life Sciences

KATHLEEN SUSMAN

❖ Presents a different way of organizing and developing biology teaching laboratories, to promote both deep learning and understanding of core concepts, while still teaching the creative process of science
❖ Consists of eight chapters that guide undergraduate instructors in creating their own inquiry based experiments
❖ The first chapter introduces the text with an articulation of why the book is so timely and necessary; the chapters that follow address pedagogical goals and desired outcomes, incorporating discovery-based laboratory experiences at the introductory level, realistic constraints on such lab experiments, model scenarios for both introductory and intermediate-level life science courses, and alternate ways to enhance student understanding
❖ Concludes with a reflection on the four imperatives outlined in the Vision and Change report – climate, food, energy and health – and how we can use these laboratory experiments to encompass those imperatives

Print ISBN: 978-1-118-90756-6 (Paper) US$59.95 • MAR 2015 • 300PP
Online ISBN: 978-1-118-90739-9

Ecology of North America

2nd Edition
BRIAN R. CHAPMAN & ERIC G. BOLENE

❖ A richly illustrated book that introduces readers to an extraordinary array of natural communities and to the subtle interactions of minerals, plants, and animals that take place within them
❖ Completely revised and updated throughout, the Second Edition of this successful text takes a qualitative, intuitive approach to the subject, beginning with an overview of essential ecological terms and concepts, such as competitive exclusion, taxa, niches, and succession
❖ Showcases dozens of exquisite photographs and illuminating maps, graphs, charts, and tables
❖ An ideal first text for students interested in natural resources, environmental science, and biology, and it is a useful and attractive addition to the library of anyone interested in understanding and protecting the natural environment

Print ISBN: 978-1-118-97154-3 (Cloth) US$87.95 • MAR 2015 • 376PP
Online ISBN: 978-1-118-97155-0

Freshwater Algae

Identification and Use as Bioindicators, 2nd Edition
EDWARD G. BELLINGER & DAVID C. SIGEE

❖ Provides a comprehensive guide to temperate freshwater algae, with additional information on key species in relation to environmental characteristics and implications for aquatic management
❖ Offers an accessible, visually appealing volume that is of immediate use to aquatic biologists for algal identification that includes key environmental information on major species
❖ Divided into two parts: part I is a general introduction to algae and techniques for sampling, measuring and observation and then looks at the role of algae as bioindicators and the implications for aquatic management, part II provides the identification of major genera and 250 important species
❖ Well illustrated in full colour with numerous original illustrations and photographs
❖ Contains new coverage of species from North America, Asia and Australia in addition to expanded coverage of molecular and computational techniques in algal biology

Print ISBN: 978-1-118-91716-9 (Cloth) US$129.95 • JAN 2015 • 288PP
Animal Signaling and Function  
An Integrative Approach  
DUNCAN J. IRSCHICK, MARK BRIFFA & JEFFREY Podos  
- Focuses on an exciting new arena of sexual selection, namely using functional approaches to understand signaling. This approach is rooted in the idea that many signals are designed to transmit important functional information that is both important for issues of male quality (and hence male competition), and female choice  
- Brings together a diverse collection of researchers who are actively investigating how function and signaling are related  
- Portrays the use of a variety of methods and taxa to study animal signaling, and we believe that this integrative view is important to open up fresh vistas for why animal signals have evolved  

Ecology of Roads  
a practitioner’s guide to impacts and mitigation  
RODNEY VAN DER REE, CLARA GRilo & DANIEL SMITH  
- Concise and easy to access, avoids scientific jargon and provides examples of best practice  
- Topics range from national and international planning schemes, Environmental Impact Assessments, the design, construction and maintenance of mitigation measures and assessing their use and effectiveness  
- Illustrated with an excellent array of photos, figures and tables, and numerous case-studies and text-boxes that demonstrate the widespread applicability of mitigation practices  
- Provides best practice detail but also focuses on providing necessary ecological background  
- Details current standards from around the world using a combination of clear ecological principles and relevant, practical case studies  
- To assist road planners, ecologists, engineers, construction and management personnel with an easy to access and concise resource that provides current information to identify, manage and mitigate the negative ecological effects of roads and traffic  

Wildland Recreation  
Ecology and Management, 3rd Edition  
WILLIAM E. HAMMITT, DAVID N. COLE & CHRISTOPHER A. MONZ  
- Includes new chapters and revision of the wildland recreation/ecology literature  
- Examines the effects of outdoor recreation activities and policies on biophysical components of ecosystems such as soil, water, wildlife, fisheries, and plant communities  
- Provides a critical analysis of topics to understand the state-of-knowledge and to identify critical gaps in the literature  
- Identification and clarification of basic theories and research generalizations of wildland recreation/ecology and important related theories in social and ecological disciplines  
- Shows analysis of the body of research in wildland recreation ecology and identification of critical needs and knowledge gaps  
- Evaluate strategies for avoiding/mitigating and managing recreation impacts, and the consequences of resource impacts on the visitor/tourist experience  
- An examination of outdoor recreation as an agent of change in natural areas and identification of the general effects of recreation of soil, vegetation, wildlife, water and air quality

**Cell & Molecular Biology**

**Atherosclerosis**

**Cellular, Molecular and Biochemical Mechanisms and Novel Therapy**

**HONG WANG**

- Comprehensive and in-depth coverage of atherosclerosis and offers cutting edge perspectives from experts in the field
- Written by an international team of authors including leading physician-scientists, research experts and physicians, chapters are divided into four major sections, covering risk factors, cellular and molecular mechanisms, biochemical mechanisms and novel and future therapeutics
- Analyses recent progress from both conceptual and technological perspectives, suggesting new directions for atherosclerosis research and treatment for a growing population of researchers and clinicians in cardiovascular and related fields

**Cancer Translational Medicine**

**ROBERT A. MEYERS**

- Contains a selection of updated articles from the acclaimed Meyers Encyclopedia of Molecular Cell Biology and Molecular Medicine, the most authoritative resource in cell and molecular biology, combined with new articles by "founding fathers" in the field
- The work is divided into nine sections:
  - Biological Basis
  - Modeling
  - Modular Parts and Circuits
  - Modular Parts and Circuits Applications
  - Synthetic Biological Pathways
  - Synthetic Genomes Techniques
  - Synthetic Genomes
  - Chemicals Production
  - Diseases and Therapeutics
- Ideally suited as advanced reading for students and postdocs, and with all current research trends covered by an impressive number of leading figures in the field, this is the first choice reference for research institutions

**Matrix Metalloproteinase Biology**

**IRIT SAGI & JEAN GAFFNEY**

- Discusses recent advances in the field of matrix metalloproteinase (MMP) research from a multidisciplinary perspective
- Written by leaders in the field of MMPs
- Covers the challenges of understanding the mechanisms substrate degradation by MMPs
- Provides an overview of the matrix metalloproteinases and focuses on the history of the proteins and the development and subsequent failure of the small molecule inhibitors in clinical trials. Furthermore, work with TIMPS, the endogenous inhibitors of the MMPs will be reviewed
- Establishes the foundation in Matrix Metalloproteinase Biology and discusses the recent progress on the design of different types of inhibitors including novel antibody based therapeutics
- Focuses on in-vivo work which will focus on cancer models, degradation of the extracellular matrix, as well as the MMPs involvement in other disease states
- Covers the future of the field and to which topics members of the field will need to concentrate their future efforts

**Stem Cell Nanoengineering**

**H. BAHARVAND**

- Examines applications of nanotechnology in stem cell research, tissue engineering, and regenerative medicine
- Details the variety in stem cells, basic principles of nanotechnology as applied to biology, the creation of nano-scaffolds, nano-tissue engineering, stem cell tracking and molecular imaging, nano-devices, and stem cell nanoengineering

Synthetic Biology

ROBERT A. MEYERS (Previously Announced)

- Contains a selection of updated articles from the acclaimed Meyers Encyclopedia of Molecular Cell Biology and Molecular Medicine, the most authoritative resource in cell and molecular biology, combined with new articles by “founding fathers” in the field
- The work is divided into nine sections:
  - Biological Basis
  - Modeling
  - Modular Parts and Circuits
  - Modular Parts and Circuits Applications
  - Synthetic Biological Pathways
  - Synthetic Genomes Techniques
  - Synthetic Genomes
  - Chemicals Production
  - Diseases and Therapeutics
- Ideally suited as advanced reading for students and postdocs, and with all current research trends covered by an impressive number of leading figures in the field, this is the first choice reference for research institutions

The Retinoids

Biology, Biochemistry, and Disease

PASCAL DOLL & KAREN NIEDERREITHER

- Provides an overview and synthesis of the retinoid molecules, from basic biology and mechanisms to diseases and therapy
- Divided into four sections, the book covers retinoic acid signaling from biochemical, genetic, developmental, and clinical perspectives
- Explains the vitamin A metabolism, storage, and tissue delivery mechanisms, the evolution of the retinoic acid signaling pathway
- Covers retinoic acid receptors and control of gene expression and includes teratology of retinoids and RA roles in embryonic development
- Explores the physiological functions of retinoids and focuses on the retinoid pathway in disease, including metabolic diseases, obesity, diabetes, leukemia, and breast cancer, as well as therapies and prevention
- Comprehensive in scope and written by leading researchers in the field, this is an essential reference for biologists, biochemists, geneticists and developmental biologists conducting retinoid research, as well as for clinicians and pharmacists in clinical research involving retinoids

Biotechnology (Life Sciences)

Biotechnology

An Illustrated Primer, 2nd Edition (Previously Announced)

ROLF D. SCHMID & RUTH HAMMELEHLE

- Presented in large format, the new Schmid is the ideal primer in biotechnology
- The two-page layout with one page being a full color figure and the opposite page being explanatory text is the ideal combination between rapid visual-based learning with in depth information
- Relevant for student courses in Biotechnology, Biology, Biochemistry, Medicine, Life Sciences and Pharmacy; lecturers; Process Engineers; Biochemists and Biological Laboratory Technicians

Print ISBN: 978-3-527-33515-2 (Paper) US$59.95 • FEB 2015 • 400PP
Drugs
From Discovery to Approval, 3rd Edition
RICK NG

- The new edition of this best-selling book continues to offer a user-friendly, step-by-step introduction to all the key processes involved in bringing a drug to the market, including the performance of pre-clinical studies, the conduct of human clinical trials, regulatory controls, and even the manufacturing processes for pharmaceutical products
- Concise and easy to read, the book quickly introduces basic concepts, then moves on to discuss target selection and the drug discovery process for both small and large molecular drugs
- Inclusion of latest developments and updates, provision of more comprehensive topics and inclusion of more materials and case studies suited to college and university use

Print ISBN: 978-1-118-90727-6 (Cloth) US$99.95 • APR 2015 • 536PP

Manufacturing of Pharmaceutical Proteins
From Technology to Economy, 2nd Edition
STEFAN BEHME

- Structured like a textbook, the second edition of this reference covers all aspects of biopharmaceutical manufacturing, including legal and regulatory issues, production facility design, and quality assurance, with a focus on supply chain management and regulations in emerging markets and cost control
- The author has longstanding industrial expertise in biopharmaceutical production and years of experience teaching at universities
- Practical book is ideal for use in academia as well as for internal training within companies

Print ISBN: 978-3-527-33766-8 (Cloth) US$129.95 • APR 2015 • 424PP
Online ISBN: 978-3-527-68310-9

Evolutionary Biology
An Introduction to Molecular Anthropology
MARK STONEKING

- Covers basic genetic concepts, such as what genes are, what they do, and how they are inherited
- Organized into three major sections, chapters build from basic genetic and evolutionary concepts to using genetics to make inferences about culture and molecular anthropology in the genomics age
- This essential primer in genetics and molecular anthropology is suitable as a supplemental resource, a stand-alone text, and an introduction and reference for professionals

Print ISBN: 978-1-118-06162-6 (Paper) US$129.95 • JUN 2015 • 350PP

Human Evolution
Wiley Blackwell Student Dictionary of Human Evolution
BERNARD WOOD

- The fossil record has grown exponentially, imaging techniques have advanced dramatically, quantitative methods have burgeoned, molecular biology has revolutionized our understanding of genetics, evolutionary history, and development, and developments across the sciences have enriched the evidence that is available
- Contains 1500 (TBD) entries produced explicitly and without jargon for those new to the subject and includes timelines, over 100 illustrations, and maps
- The glossary provides the etymology of the term, a simple explanation and, where appropriate, references to papers that provide more information
- An indispensable tool for undergraduates and those studying human evolution

Print ISBN: 978-1-405-15506-9 (Cloth) US$149.95 • JAN 2015 • 432PP
Online ISBN: 978-1-118-33575-8
Molecular Microbiology

**Biological Nitrogen Fixation**

*2 Volume Set*

**FRANS J. DE BRUIJN**

- A comprehensive 2-volume work bringing together both review and original research articles on key topics in nitrogen fixation
- Chapters across all two volumes emphasize molecular techniques and advanced biochemical analysis approaches applicable to various aspects of biological nitrogen fixation
- Volume I explores the chemistry and biochemistry of nitrogenases, *nif* gene regulation, the taxonomy, evolution, and genomics of nitrogen fixing organisms, as well as their physiology and metabolism.
- Volume II covers the symbiotic interaction of nitrogen fixing organisms with their host plants, including nodulation and symbiotic nitrogen fixation
- Features chapters on the "omics" of nitrogen fixing organisms and host plants, nitrogen fixing cyanobacteria and archaea, nitrogen fixing plant growth promoting rhizobacteria and non-legumes, as well as field studies and nitrogen fixation in cereals
- Covering the full breadth of current nitrogen fixation research and synthesizing it to point the way forward, this book will be a one-stop reference for microbial ecologists and environmental microbiologists as well as plant and agricultural researchers working on crop sustainability

Print ISBN: 978-1-118-63704-3 (Cloth) US$649.95 • APR 2015 • 1130PP

**Biological Nitrogen Fixation Volume I**

**Biological Nitrogen Fixation**

*Volume I*

**FRANS J. DE BRUIJN**

- A comprehensive 2-volume work bringing together both review and original research articles on key topics in nitrogen fixation
- Chapters across all two volumes emphasize molecular techniques and advanced biochemical analysis approaches applicable to various aspects of biological nitrogen fixation
- Volume I explores the chemistry and biochemistry of nitrogenases, *nif* gene regulation, the taxonomy, evolution, and genomics of nitrogen fixing organisms, as well as their physiology and metabolism.
- Volume II covers the symbiotic interaction of nitrogen fixing organisms with their host plants, including nodulation and symbiotic nitrogen fixation

**Clinical Microbiology (Life Sciences)**

**Bone and Joint Infections**

*From Microbiology to Diagnostics and Treatment*

**W. ZIMMERLI**

- First book to take a multidisciplinary approach to covering the causes and treatment of osteomyelitis and septic arthritis
- Correct and rapid diagnosis of bone and joint infection requires the input of a variety of specialists, and *Bone and Joint Infection* takes a similarly collaborative and comprehensive approach, including chapters from a diverse group of clinicians, researchers, and surgeons
- Covers both the basic microbiology and clinical aspects of bone and joint infection, this book will be a valuable resource both for researchers in the lab and for physicians and surgeons seeking a comprehensive reference on osteomyelitis and septic arthritis

Print ISBN: 978-1-118-58177-3 (Cloth) US$199.95 • JAN 2015 • 432PP
**Mycology**

**Fungal Bio-Molecules**

Sources, Applications and Recent Developments

Vijay K. Gupta, Sreenivasaprasad & Robert Ludwig Mach

- Provides a deep understanding of the biology of different fungi in diverse ecosystems, as well as their biotrophic interactions with other microorganisms, animals and plants, to underpin effective and innovative technological developments
- A keystone reference, integrating branches of fungal product research into a comprehensive volume of interdisciplinary research
- Reflects state-of-the-art research and current emerging issues in fungal biology and biotechnology
- Reviews the methods and experimental work used to investigate different aspects of fungal biomolecules
- Provides examples of the diverse applications of fungal biomolecules in the areas of food, health and the environment
- Edited by an experienced team, with contributions from international specialists
- This book is an invaluable resource for industry-based researchers, academic institutions and professionals working in the area of fungal biology and associated biomolecules for their applications in food technology, microbial and biochemical process, biotechnology, natural products, drug development and agriculture

Print ISBN: 978-1-118-95829-2 (Cloth) US$189.95 • Mar 2015 • 424PP

Online ISBN: 978-1-118-95830-8

---

**Genetics**

**The Dictionary of Genomics, Transcriptomics and Proteomics**

5th Edition 4 Volume Set

Günter Kahl

- Comprehensive fifth edition and for the first time available as an electronic product with all entries cross-linked
- A successful long-seller that has been thoroughly updated and greatly expanded. It now contains over 13,000 entries, and comprehensively covering genomics, transcriptomics, and proteomics
- Each entry contains an extensive explanation, including a comprehensive listing of synonyms and acronyms, and all formulas have been redrawn to create a uniform style, while most of the figures are custom designed for this dictionary
- The ultimate reference for all terms in the -omics fields

**Intended Audience:** Gene Technologists, Biotechnologists, Biotechnological Industry, Cell Biologists, Libraries at Universities, Company Libraries

Print ISBN: 978-3-527-32852-9 (Cloth) US$899.95 • Mar 2015 • 2520PP

Online ISBN: 978-3-527-68797-8

---

**Molecular Techniques**

**Modern Techniques for Pathogen Detection**

Jürgen Popp & Michael Bauer

- This outstanding overview sets a new standard for a methods book on pathogen detection
- Provides an outline of currently used routine methods, including their background, strengths and weaknesses, as well as comparing them to newer methods
- Covers novel methods already in wide use and which are still more experimental for routine purposes
- An invaluable resource for all medical laboratories and clinical institutions dealing with infectious diseases

**Intended Audience:** Spectroscopists, Oncologists, Clinical Physicists, Bioengineers, Medical Laboratories, Pharmaceutical Industry, Biotechnological Industry

Print ISBN: 978-3-527-33516-9 (Cloth) US$129.95 • Apr 2015 • 328PP

Online ISBN: 978-3-527-68797-8
Plant Genes, Genomes and Genetics
ERICH GROTEWOLD, ELIZABETH KELLOGG & JOSEPH CHAPPELL

- Provides a comprehensive treatment of all aspects of plant gene expression. Unique in explaining the subject from a plant perspective, it highlights the importance of gene expression in how plants interface with the modern world, and notes the many aspects of gene expression that were first discovered in plants.
- Covers topics ranging from plant genome structure and the key control points in how genes are expressed, to the mechanisms by which proteins are generated and how their activities are controlled and altered by posttranslational modifications.
- Edited by authorities in the field, with contributions from invited experts.
- Specific examples that highlight when and how plants operate differently from other organisms.
- Special sections that provide in-depth discussions of particular issues.
- End-of-chapter problems to help students recapitulate the main concepts.
- While primarily aimed at upper level undergraduates and graduate students in Plant Biology, this text is equally suited for advanced Agronomy and Crop Science students inclined to understand molecular aspects of organismal phenomena.

Print ISBN: 978-1-119-99888-4 (Cloth) US$149.95 / 978-1-119-99887-7 (Paper) US$79.95 • JAN 2015 • 264PP

Neuroscience

Brain Stimulation
Methodologies and Interventions
IRVING RETI

- An introduction to the field of brain stimulation technology and its applications.
- Explores how brain stimulating technologies work in the context of brain pathways that mediate normal and abnormal brain function.
- Focuses on neuroanatomy and activity-dependent changes in neuronal function triggered by brain stimulation.
- Concentrates on the brain stimulation technologies, including noninvasive procedures that rely on convulsive or seizure therapeutics, and non-convulsive therapies such as magnetic and electrical brain stimulation.
- Written and edited by an international group of leaders in the field, Brain Stimulation will be a valuable resource for both neuroscience academics and clinicians.

Print ISBN: 978-1-118-56829-3 (Cloth) US$149.95 • MAR 2015 • 360PP
Online ISBN: 978-1-118-56832-3

Circadian Medicine
CHRISTOPHER S. COLWELL

- A wide-ranging foundational text that provides students and researchers with valuable information on the molecular and genetic underpinnings of circadian rhythms and looks at the impacts of disruption in our biological clocks in health and disease.
- Lay the fundamental groundwork on circadian rhythm biology.
- Looks at the impact of circadian rhythms on major organ systems and focuses on the central nervous system. The book then closes with a look at the role of biological rhythms in aging and neurodegeneration.
- Written in an accessible and informative style, Circadian Rhythms: Health and Disease, will be an invaluable resource and entry point into this fascinating interdisciplinary field that brings together aspects of neuroscience, cell and molecular biology, and physiology.

Print ISBN: 978-1-118-46778-7 (Paper) US$129.95 • MAR 2015 • 350PP
Online ISBN: 978-1-118-46783-1
Handbook of Olfaction and Gustation
3rd Edition
RICHARD L. DOTY
◆ The largest collection of basic, clinical, and applied knowledge on the chemical senses ever compiled in one volume, the third edition of Handbook of Olfaction and Gustation encompass recent developments in all fields of chemosensory science, particularly the most recent advances in neurobiology, neuroscience, molecular biology, and modern functional imaging techniques
◆ Divided into five main sections, the text covers the senses of smell and taste as well as sensory integration, industrial applications, and other chemosensory systems
◆ This is essential reading for clinicians and academic researchers interested in basic and applied chemosensory perception

The Cranial Nerves
An Introduction to the Unique Nerves of the Head, Neck, and Special Senses
JOEL A. VILENSKY & SID GILMAN
◆ An engaging and valuable primer on the biological function and clinical importance of these unique nerves
◆ Explores the history of our understanding of the cranial nerves and a brief introduction of key neuroanatomical concepts that will inform the clinical portions that follow
◆ Detailing each nerve and its unique function and impact on our senses, motor function, and health
◆ Vividly illustrated and supported by real-life clinical cases, the book will appeal to anyone looking to gain a better understanding of cranial nerves
◆ Merging foundational anatomical and biological information with intriguing clinical cases, this book introduces readers to the anatomy and diverse function of this unique family of nerves

The Genetics of Neurodevelopmental Disorders
K. MITCHELL
◆ Neurodevelopmental disorders cover a wide range of diseases and impairments that include developmental and intellectual disabilities, some forms of epilepsy, autism spectrum disorders and neuropsychiatric disease
◆ Takes an innovative approach to the many recent advances in our understanding of the genetic architecture of these disorders. The book explores both basic discoveries and the translation of new findings into the clinical setting
◆ Six chapters that look at broad conceptual issues that are relevant to understanding neurodevelopmental disorders
◆ Presents our current understanding of disorders grouped by the impacted neurodevelopmental process. The following section looks at the elucidation of pathogenic mechanisms following genetic discoveries. The book then closes with two chapters that consider the clinical implications of the recent advances in the field
◆ A timely synthesis of the field, an essential resource for neuroscientists, neurologists, and neuropsychiatric researchers, and advanced students

Print ISBN: 978-1-118-52488-6 (Cloth) US$149.95 • April 2015 • 374PP
Online ISBN: 978-1-118-52494-7

The Neuroscience of Visual Hallucinations
DANIEL COLLERTON
◆ Provides a comprehensive survey of the neuroscience of visual hallucinations and the clinical techniques for testing these
◆ Brings together the very latest evidence from cognitive neuropsychology, neuroimaging, neuropathology, and neuropharmacology, placing this within current models of visual perception
◆ Leading researchers from a range of clinical and basic science areas describe visual hallucinations in their historical and scientific context, combining introductory information with up-to-date discoveries. They discuss results from the main investigatory techniques applied in a range of clinical disorders
◆ Outlines future research directions investigating the potential for new understandings of veridical and hallucinatory perceptions, and for treatments of problematic hallucinations
◆ Fully comprehensive, this is an essential reference for clinicians in the fields of the psychology and psychiatry of hallucinations, as well as for researchers in departments, research institutes and libraries
◆ This book has a strong foundations in neuroscience, cognitive science, optometry, psychiatry, psychology, clinical medicine, and philosophy
◆ With its lucid explanation and many illustrations, it is a clear resource for educators and advanced undergraduate and graduate students

Print ISBN: 978-1-118-73170-3 (Cloth) US$199.95 • January 2015 • 384PP
Online ISBN: 978-1-118-89279-4
Neurophysiology

Diet and Exercise in Cognitive Function and Neurological Diseases
AKHLAQ A. FAROOQUI & TAHIRA FAROOQUI

- Looks at the role and impact that nutrition and activity have on cognitive function and neurological health
- The book is divided into two sections. The first focuses on diet and its impact on neurobiological processes. Chapters focus on the impacts of specific diets, such as the Mediterranean diet, ketogenic and vegan diets, as well as the role specific nutrients, fats, fatty acids, and caloric intake have on neurological health and cognitive function
- The second part of the book focuses on exercise, and its role in maintaining cognitive function, reducing neuroinflammatory responses, regulating adult neurogenesis, and healthy brain aging
- Examines the impacts of disease in the management of specific neurological disorders such as multiple sclerosis and Parkinson’s disease
- A timely reference on the neurobiological interplay between diet and exercise on long-term brain health and cognitive function

Print ISBN: 978-1-118-84055-9 (Cloth) US$219.95 • 408PP
Online ISBN: 978-1-118-84063-4

Neuroinflammation in the Central Nervous System
SAM DAVID

- Neuroinflammation has long been studied in its connection to the development and progression of Multiple Sclerosis. In recent years, it has expanded to look at the role of inflammatory processes in a wide range of neurological diseases and cognitive disorders including Alzheimer’s Disease, Parkinson’s and autism. Researchers have also started to appreciate the beneficial impacts of neuroinflammation in certain diseases
- Looks across the discipline and provides a comprehensive picture of the field
- This book consists of five sections. The opening section looks at fundamental aspects of neuroinflammation. This is followed by two sections that look at the detrimental and beneficial aspects of inflammation on the brain and nervous system. The final two sections look at emerging research on systemic inflammation and the impact of neuroinflammation on the peripheral nervous system
- Providing cross-disciplinary coverage, this book will be an essential volume for neuroimmunologists, neurobiologists, neurologists and anyone interested in the field

Print ISBN: 978-1-118-73282-3 (Cloth) US$149.95 • 312PP
Online ISBN: 978-1-118-73274-0

Entomology

The Braconid and Ichneumonid Parasitoid Wasps
Biology, Systematics, Evolution and Ecology
DONALD L. J. QUICKE

- This book considers Braconidae and Ichneumonidae families, highlighting similarities and differences in their adaptations
- New evidence, largely in the form of molecular data, have shown that many morphological, behavioural, physiological and anatomical characters associated with basic life history features, specifically whether wasps are ecto- or endoparasitic, or idiobiont or koinobiont, can be grossly misleading in terms of the phylogeny they suggest. This book shows how, with better supported phylogenetic hypotheses entomologists can understand far more about the ways natural selection is acting upon them
- Covers the same areas as Parasitic Wasps (Springer, 1997) (behaviour, physiology, development, anatomy, venoms, sex, ecology and evolution), but they have been brought up to date in this book (much new data has become available over the intervening years)
- Focuses on this superfamily with which the author has great familiarity and provides a detailed coverage of each subfamily, emphasising anatomy, taxonomy and systematics, biology, as well as pointing out the importance and research potential of each group
- Fossil taxa are included and it also has sections on biogeography, global species richness, culturing and rearing and preparing specimens for taxonomic study
- Highlights areas where research might be particularly rewarding and suggests systems/groups that need investigation. The author provides a large compendium of references to original research on each group
- This book is an essential workmate for all postgraduates and researchers working on ichneumonoid or other parasitic wasps worldwide
- It will stand as a reference book for a good number of years, and while rapid advances in various fields such as genomics and host physiological interactions will lead to new information, as an overall synthesis of the current state it will stay relevant for a long time

Print ISBN: 978-1-118-90705-4 (Cloth) US$219.95 • 704PP
Forensic Science

Forensic Archaeology
A Global Perspective
W. J. Mike Groen, Nicholas Mrquez-Grant & Rob Janaway

- Unique reference that contains 57 chapters from experienced forensic archaeological practitioners working in different countries, intergovernmental organisations or NGO’s
- Shows that the practice of forensic archaeology varies worldwide as a result of diverse historical, educational, legal and judicial backgrounds
- An invaluable reference to archaeologists, humanitarian and human rights workers, forensic scientists, forensic practitioners, professionals working in the criminal justice systems and all other individuals who are interested in the potential forensic archaeology has to offer at scenes of crime or places of incident
- Promotes the development of forensic archaeology worldwide
- Proposes an interpretative framework that is grounded in archaeological theory and methodology, integrating affiliated behavioural and forensic sciences

Print ISBN: 978-1-118-74598-4 (Cloth) US$149.95 • apr 2015 • 632PP
Online ISBN: 978-1-118-74597-7

The Global Practice of Forensic Science
Douglas H. Ubelaker

- Presents histories, issues, patterns, and diversity in the applications of international forensic science
- Written by 64 experienced and internationally recognized forensic scientists, the volume documents the practice of forensic science in 28 countries from Africa, the Americas, Asia, Australia and Europe
- Each country’s chapter explores factors of political history, academic linkages, the influence of individual cases, facility development, types of cases examined, integration within forensic science, recruitment, training, funding, certification, accreditation, quality control, technology, disaster preparedness, legal issues, research and future directions
- Aimed at all scholars interested in international forensic science, the volume provides detail on the diverse fields within forensic science and their applications around the world

Print ISBN: 978-1-118-72416-3 (Cloth) US$129.95 • Jan 2015 • 368PP
Online ISBN: 978-1-118-72424-8

Bioinformatics & Computational Biology

Bioinformatics and Functional Genomics
3rd Edition
Jonathan Pevsner

- The latest revision of this bestselling and indispensable text book. Thoroughly updated to encompass the latest advances in the field the book retains its broad and accessible approach
- Divided into three parts the book deals first with bioinformatics, the use of computer databases and computer algorithms in the study of proteins and genes. The first section includes sequence alignment, database searches and phylogeny. The second section of the book focuses on functional genomics and includes approaches such as gene expression profiling and proteomics that are used to study cellular function. The final part of the book deals with genomics which is the study of the collection of DNA that comprises an organism, using the tools of bioinformatics
- An excellent single-source textbook for advanced undergraduate and beginning graduate-level courses in the biological sciences and computer sciences
- An essential resource for biologists in a broad variety of disciplines who use the tools of bioinformatics and genomics to study particular research problems; bioinformaticists and computer scientists who develop computer algorithms and databases; and medical researchers and clinicians who want to understand the genomic basis of viral, bacterial, parasitic, or other diseases

Print ISBN: 978-1-118-58178-0 (Cloth) US$99.95 • Apr 2015 • 1032PP
Networking for Nerds
Find, Access and Land Hidden Game-Changing Career Opportunities Everywhere
ALAINA G. LEVINE & NOBEL LAUREATE BRIAN SCHMITT
✤ Provides a step-by-step guide to understanding how to access hidden professional opportunities through networking
✤ With an emphasis on practical advice on how and why to network, you will learn how to formulate and execute a strategic networking plan that is dynamic, multi-dimensional, and leverages social media platforms and other networking channels
✤ An invaluable resource for both established and early-career scientists and engineers (as well as networking neophytes!) by offering concrete insight on crafting professional networks that are mutually-beneficial and support the advancement of both your career goals and your scholarly ambitions
✤ Written by award-winning entrepreneur and strategic career planning expert Alaina G. Levine, this book is an essential resource for anyone working in scientific and engineering fields looking to enhance their professional planning for a truly fulfilling, exciting, and stimulating career

Women in the Geosciences
Practical, Positive Practices Toward Parity
MARY ANN HOLMES, KUHELI DUTT & SUZANNE O'CONNELL
✤ The geoscience workforce has a lower proportion of women compared to the general population of the United States and compared to many other STEM fields
✤ Explores issues pertaining to gender parity in the geosciences, and sheds light on some of the best practices that increase participation by women and promote parity
✤ Volume highlights include:
  ✤ Lessons learned from NSF-ADVANCE
  ✤ Data on gender composition of faculty at top earth science institutions in the US
  ✤ Implicit bias and gender as a social structure
  ✤ Strategies for institutional change
  ✤ Dual career couples
  ✤ Family friendly policies
  ✤ Role of mentoring
  ✤ Career advancement for women
  ✤ Recruiting diverse faculty
  ✤ Models of institutional transformation
✤ A valuable contribution to the existing literature on gender issues in STEM disciplines. It focuses specifically on the geosciences, with a goal to spreading awareness on the best practices for gender parity in academic geoscience departments. Geoscientists, policymakers, educators and administrators could all greatly benefit from the contents of this volume

General Dentistry
Clinical Applications of Digital Dental Technology
RADI MASRI & CARL DRISCOLL
✤ A comprehensive volume that consolidates all the digital technologies used in dentistry
✤ Includes descriptions of current technology and the contraindications, advantages, disadvantages, limitations and applications in various dental fields, as well as likely future developments and products
✤ Includes digital imaging, digital impressions, digital operative dentistry, digital prosthodontics, digital implant fabrication and placement, and digital applications in endodontics, orthodontics and oral surgery
✤ 350 clinical photographs and radiographic images
✤ Ideal for dental students seeking a reference for digital dental technology and for seasoned practitioners and specialists interested in incorporating digital technology in their daily practice
Lasers in Dentistry
Guide for Clinical Practice
PATRICIA DE FREITAS & ALYNE SIMÕES

✦ Provides concise, easy-to-follow instruction for incorporating lasers into everyday clinical practice
✦ Features sequential illustrations of step-by-step procedures
✦ Coalesces the latest advances in clinical application from experts worldwide
✦ Includes multiple case examples to further illustrate procedures discussed
✦ An essential tool for practitioners and students looking to broaden their skill set in laser dentistry

The Dentist's Quick Guide to Medical Conditions
MEA A. WEINBERG, STUART L. SEGELNICK, JOSEPH S. INSLER & SAMUEL KRAMER

✦ Presents all the relevant information dentists need – from symptoms, diagnostic tests, prescription, to dental management for each disease and condition
✦ Includes explanations of drug interactions
✦ Highlights the latest tests and diagnostic procedures
✦ Includes AHA guidelines for antibiotic prophylaxis
✦ Highly recommended for General dentists, dental specialists and dental hygienists

Online ISBN: 978-1-118-99147-3

Periodontology
Minimally Invasive Periodontal Therapy
Clinical Techniques and Visualization Technology
STEPHEN K. HARREL & THOMAS G. WILSON JR.

✦ Evidence-based presentation of the latest technologies in surgical microscopes, dental endoscopes, and dental videoscopes, along with the advantages and disadvantages of minimally invasive therapies, rationale for the approach, and limitations of each method
✦ Includes clinical cases and step-by-step guidance on the clinical use of each technique
✦ Companion website features video demonstrations of visualization techniques

Online ISBN: 978-1-118-96070-7

Oral & Maxillofacial Surgery
Atlas of Operative Oral and Maxillofacial Surgery
CHRISTOPHER J. HAGGERTY & ROBERT M. LAUGHLIN

✦ An innovative, multidisciplinary atlas covering the core aspects of oral and maxillofacial surgery, head and neck reconstructive surgery and facial cosmetic surgery
✦ Depicts surgical techniques using high-resolution colour illustrations and images
✦ Written by experts in the field and designed to provide high-yield information pertaining to procedure indications, contraindications, pertinent anatomy, techniques, post-operative management, complications and key points
✦ Procedures presented in a standard format following the board certification exam
✦ Contains more than 950 coloured illustrations and images, along with case reports

Print ISBN: 978-1-118-44234-0 (Paper) US$169.99 • Feb 2015 • 544PP
Online ISBN: 978-1-118-99372-9
Atlas of Temporomandibular Joint Surgery

Peter Quinn & Eric Granquist

- A major revision of Dr. Quinn's classic work, taking into account new procedures, equipment, and evidence-based findings from the latest research in TMJ treatment
- Concise, how-to surgical atlas that focuses on the surgical remedies for disorders beyond conservative treatment
- Guides both the novice and experienced surgeon through the intra-articular and extra-articular procedures that have proven efficacious in the treatment of advanced craniomandibular dysfunction
- Chapters take readers through decision making for TMJ surgery, diagnostic imaging methods, surgical approaches, surgery for internal derangements, trauma, osseous surgical procedures, total joint replacement, and pathologies
- Colour photographs and illustrations throughout, with companion website containing photographs and videos

Online ISBN: 978-1-118-96331-9

Fractures of the Facial Skeleton

Michael Perry, Andrew K. Brown & Peter Banks

- Incorporates developments and improvements in maxillofacial trauma management into a practical handbook ideal for postgraduate students and trainees
- Easy-to-read with summary text boxes and colour illustrations to enhance comprehension
- Expanded sections on diagnostic imaging and soft tissue injury

Print ISBN: 978-1-119-96766-8 (Paper) US$63.95 • Mar 2015 • 192PP

Oral Anatomy & Physiology

Fundamentals of Oral Histology and Physiology

Arthur R. Hand & Marion E. Frank

- A landmark new text that integrates normal histology and physiology, enabling students to understand key concepts and their application to clinical practice
- Brief summaries at key points in the text used for highlighting significant information and concepts
- A comprehensive glossary for defining important terms in each chapter
- Uses high quality photomicrographs, drawings, charts, and tables to illustrate fundamental concepts
- Incorporates clinical correlations for common diseases and conditions
- Includes case studies in several chapters
- Access to a companion website featuring student review questions, case scenarios, figures and tables

Print ISBN: 978-1-118-34291-6 (Paper) US$69.99 • Jan 2015 • 296PP

Oral Pharmacology

Anesthesia Complications in the Dental Office

Robert Bosack & Stuart Lieblach

- Presents the most up-to-date information on treating anesthesia complications and medical emergencies
- Discusses issues such as patient risk assessment, considerations for special needs and medically compromised patients, routinely administered anesthetic agents, adversities that can arise before, during, and after administration of anesthesia, and emergency drugs and equipment
- A must-have reference for oral surgeons, general dentists, hospital dentists, pediatric dentists and special care dentists

Online ISBN: 978-1-119-05323-1
Pediatric Dentistry

Handbook of Clinical Techniques in Pediatric Dentistry
JANE A. SOXMAN

- Provides the clinician with an increased level of expertise and skills for the timely identification and intervention of various presentations in the developing dentition
- Clearly describes procedures for treatment in the primary and young permanent dentitions, including pulp therapy for primary and young permanent molars, extractions, space maintenance, and more
- Commonly encountered treatment needs are discussed with the goal of increasing clinician and staff confidence while decreasing chair-time and stress
- Written by leaders in pediatric dentistry and contains over 200 clinical photographs
- Companion website features video demonstrations of procedures from the book

Gerodontology

Textbook of Geriatric Dentistry
3rd Edition
POUL HOLM-PEDERSEN, ANGUS WALLS & JONATHAN SHIP

- Captures the major advancements in the field since the previous edition that was published over a decade ago
- Focuses on the clinical aspects of geriatric dentistry, with a continued emphasis on the fundamental considerations that influence care
- Colour images are used liberally throughout the book

Print ISBN: 978-1-405-15364-5 (Cloth) US$149.99 • FEB 2015 • 376PP

Online ISBN: 978-1-118-90833-4

Orthodontics

Biological Mechanisms of Tooth Movement
2nd Edition
VINOD KRISHNAN & ZE’EV DAVIDOVITCH

- An authoritative and comprehensive reference on the scientific foundations underpinning clinical orthodontics
- Global authorship with coverage on topics such as bone biology, the effects of mechanical loading on tissues and cells, genetics, inflammation, tissue remodeling and the effects of diet, drugs, and systemic diseases
- Highly-illustrated and expanded to include new developments in genomics, rapid orthodontics and current controversies in tooth movement research
- Excellent reference for trainees, qualified specialists and researchers in orthodontics

Print ISBN: 978-1-118-68887-8 (Cloth) US$199.98 • FEB 2015 • 376PP

Online ISBN: 978-1-118-91614-8

Health & Social Care

Dementia For Dummies
UK Edition
SIMON ATKINS

- This book is a hands-on guide to dealing with dementia
- Gives readers the straight facts on dementia, covers the symptoms, causes and risk factors of dementia and helps identify and address the fears as you face a diagnosis
- Provides carers and family members with the information needed to help manage the illness
- Readers will get an understanding of the symptoms of dementia, make sense of the stages of the illness and grasp the differences between the various types of dementia, including Alzheimer’s disease and vascular dementia

Walking the Weight Off For Dummies
ERIN PALINSKI-WADE

- If you're looking to lose weight and get fit, *Walking the Weight Off For Dummies* will show you just what to do to walk yourself to a whole new you
- Learn how walking is the ideal exercise to achieve and maintain healthy body weight and improve overall health
- Figure out the best techniques to avoid injury and achieve your specific fitness goals
- Dive into nutrition tips for fueling up before and after walks to maintain health

Yoga All-In-One For Dummies
CONSUMER DUMMIES

- If you want to incorporate yoga into your daily routine or ramp up what you’re already doing, *Yoga All-In-One For Dummies* is the perfect resource!
- This complete compendium of six separate titles features everything you need to improve your health and peace of mind with yoga, and includes additional information on, stretching, meditation, adding weights to your yoga workouts, and power yoga moves
- Use companion workout videos to help you master various yoga poses and techniques that are covered in the book
- Utilize tips in the book to increase balance, range of motion, flexibility, strength, and overall fitness

Research Methods in Health Promotion
2nd Edition
LAURA F. SALAZAR, RICHARD A. CROSBY & RALPH J. DICLEMENTE

- The bestselling textbook to understanding health research, updated and expanded
- Provides students and practitioners with basic knowledge and skills regarding the design, implementation, analysis, and interpretation of research in the field of health promotion
- Breaks the sometimes-daunting process of research into simple and well-defined steps, encouraging the student to think about research as a sequential process
- This new edition includes more about basics of social science research, an added emphasis on environmental and global health examples, new chapters (participatory research, survey research, and qualitative data analyses), and expansion of coverage of sampling

Print ISBN: 978-1-118-40906-0 (Paper) US$89.95 • MAR 2015 • 502PP

Early Years Nutrition and Healthy Weight
LAURA STEWART & JOYCE THOMPSON

- Only practitioner handbook dedicated to the early years of childhood as the key to ensuring healthy weight in later life
- Covers pregnancy through to pre-school and early school years interventions
- Also addresses the social and psychological issues that underpin nutritional problems
- International group of expert authors consider the issue across the developed world
- Case studies in each chapter illustrate the application of theory to practice
- A valuable text for health visitors, pediatricians and general practitioners, students of nutrition and dietetics specialising in pediatric nutrition

Print ISBN: 978-1-118-79244-5 (Paper) US$49.95 • JAN 2015 • 136PP
Online ISBN: 978-1-119-02325-8
Health, Diet & Nutrition

Diabetes Cookbook For Dummies
4th Edition
ALAN L. RUBIN

- Diabetes Cookbook For Dummies, 4th Edition gives you everything you need to create healthy and diabetic-friendly meals
- Offers 100+ new and revised diabetic recipes for every meal of the day
- Covers how to make smart choices when eating out, shopping for food, and setting up a diabetic kitchen. It also introduces ways to involve diabetic children in meal planning and preparation
- Features changes in fat, carbohydrate, and protein recommendations that parallel the meal plan recommendations of the American Diabetes Association

Print ISBN: 978-1-118-94423-3 (Paper) US$22.95 • JAN 2015 • 400PP

Natural Cures For Dummies
SCOTT BANKS & JOE KRAYNAK

- Offers clear, expert guidance on dietary changes, healing foods, and natural supplements to treat common conditions
- Includes down-to-earth descriptions of health problems and the range of natural remedies that can be used to manage them
- Shows you how natural cures can treat over 130 of the most common ailments
- Demonstrates how you can dramatically boost your health and wellbeing the natural way

Print ISBN: 978-1-119-02280-0 (Paper) US$22.95 • MAR 2015 • 360PP

Paleo All-In-One For Dummies
CONSUMER DUMMIES

- Paleo All-In-One For Dummies is the powerhouse resource that includes all the information you’ll need to get started with the Paleo lifestyle or further refine your diet if you’re already a convert!
- With content from leading authorities on the Paleo lifestyle, this easy-to-read, all-in-one resource offers a complete overview of living the primal life to lose weight, improve athletic performance, get fit, and stay healthy
- Use the tips from the book to change your diet to include healthy, natural foods, then jump into the companion workout videos to master the Paleo moves and techniques that are featured in the book

Print ISBN: 978-1-119-02277-0 (Paper) US$26.95 • FEB 2015 • 528PP

Paleo Desserts For Dummies
ADRIANA HARLAN

- Provides more than 125 recipes that are all made with nourishing, whole foods with no added refined sugars, gluten, grains, or soy
- Includes Paleo recipes for holiday treats, like chocolate pumpkin pie, Halloween ghost truffles, and a fudgy peppermint bark
- Gives you access to a handful of additional Paleo dessert recipes on dummies.com
- Helps you discover the healthy alternatives to sugar and chemical-laden junk food

Print ISBN: 978-1-119-02280-0 (Paper) US$22.95 • APR 2015 • 336PP

Preventing and Reversing Heart Disease For Dummies
JAMES M. RIPPE

- The safe and trusted way to prevent and reverse heart disease
- Written in plain English and packed with tons of authoritative advice, Preventing & Reversing Heart Disease For Dummies includes the most up-to-date information on coronary heart disease and its treatment
- Helps you find the right doctor and handle a managed care plan
- Covers all thirteen types of heart disease and discusses the key differences that may determine their progression and treatment
- Illustrates how simple changes in diet may be enough to prevent heart disease

Print ISBN: 978-1-118-94423-3 (Paper) US$22.95 • JAN 2015 • 360PP
For many, the language of medicine and healthcare can be confusing, and frequently presents the greatest challenge to students – this guide was designed to help you overcome this problem with ease!

Packed with ideas, study materials, quizzes, mind maps, and games to help you retain the information, Medical Terminology For Dummies, 2nd Edition quickly gets you up to speed on medical prefixes, suffixes, and root words so you’ll approach even unfamiliar medical terms with confidence and ease.

If you’re working toward a certification or degree in a medical or healthcare field, or if you’re already on the job, this book is the fast and easy way to learn the lingo.

Medical Terminology For Dummies
**Immunology**

*Immunology: A Short Course, 7th Edition*  
RICHARD COICO & GEOFFREY SUNSHINE  

- Introduces all the critical topics of modern immunology in a clear, succinct yet comprehensive fashion for undergraduates and medical students  
- Each chapter is divided into short, self-contained units to address key topics and illustrated with uniformly drawn, full-colour illustrations and photographs  
- Contains a brand new art program to reinforce learning and includes a plethora of student support, including end of chapter summaries and review questions  

Print ISBN: 978-1-118-39691-9 (Paper) US$62.95 • APR 2015 • 448PP

**Allergy & Clinical Immunology**

*Mount Sinai Expert Guides: Allergy & Clinical Immunology*  
HUGH A. Sampson  

- Provides trainees in allergy and immunology with an extremely clinical and accessible handbook covering the major disorders and symptoms, their diagnosis and clinical management  
- Perfect as a point-of-care resource on the hospital wards and also as a refresher for board exam preparation  
- Focus is on providing rapid, essential information on each disorder to allow for quick, easy browsing and assimilation of the must-know information  
- Companion website with extra features such as case studies, questions for self-assessment, key patient advice and ICD codes  

Print ISBN: 978-1-118-60916-3 (Paper) US$87.95 • APR 2015 • 512PP

**Cardiovascular Imaging**

*Dynamic Cardiac and Thoracic Imaging*  
PATRICK CLARYSSE  

- Presents current and emerging methods developed for the acquisition of images of moving organs in the five main medical imaging modalities:  
  - conventional X-rays  
  - computed tomography (CT)  
  - magnetic resonance imaging (MRI)  
  - nuclear imaging and ultrasound  
- The availability of dynamic image sequences allows for the qualitative and quantitative assessment of an organ’s dynamics, which is often linked to pathologies  

Print ISBN: 978-1-118-21323-0 (Cloth) US$144.95 • JAN 2015 • 350PP

**Electrophysiology**

*The Nuts and Bolts of Implantable Device Therapy: Pacemakers*  
TOM KENNY  

- Authored by Tom Kenny, one of the best-known and well-respected educators in EP  
- Practical, accessible, highly illustrated approach  
- Provides an overview of the algorithms and devices offered by the world’s five pacemaker manufacturers  
- Offers learning objectives, test questions and essential points in bulleted lists  
- Perfect introductory guide to the topic and assumes readers have little baseline knowledge  
- Essential reference for residents, fellows, EP nurses, general clinical cardiologists, EP fellows and industry professionals  

Print ISBN: 978-1-118-67067-5 (Paper) US$76.95 • JAN 2015 • 336PP

Online ISBN: 978-1-118-67063-7
Interventional Cardiology

**Cardiac Devices**
A Hands-on Guide to Procedures and Programming

**AMIN AL-AHMAD**

- A single volume that focuses on the essential tasks, common pitfalls and likely complications
- Edited by a team of leading clinician-educators, the book highlights best-practices using a practical, hands-on, how-to-do-it approach
- Aims to help readers master challenging device-related tasks quickly, such as programming hybrid pacing/defibrillation devices and responding confidently when complications arise
- Features 300 images, including ECGs, X-ray and fluoroscopy, images from device interrogation, color electroanatomical maps, and more
- An enhanced eBook version is available, featuring video of key tasks and procedures described in the text

Online ISBN: 978-1-118-82067-4

---

**The IVUS Manual**

**R. GERBER**

- Written by three of today’s leading IVUS experts/educators, this new book teaches readers how to use IVUS optimally in all of the clinical scenarios in which it is commonly used
- Tapping on 24 actual patient cases as the basis for instruction, the authors guide readers from the most basic applications of IVUS through increasingly complex procedures
- Each case is paired with actual IVUS images, X-rays and angiographic views that clearly show the vein, the clinical problem, and the view inside the vein before, during (as appropriate) and after a procedure or other treatment has been completed
- A companion website includes video clips for each of the cases covered, enabling readers to see IVUS at work

Print ISBN: 978-1-118-77624-7 (Cloth) US$129.90 • APR 2015 • 256PP
Online ISBN: 978-1-118-77641-4

---

**Acne**
Causes and Practical Management

**F. WILLIAM DANBY**

- Provides readers at all levels with a practical, well-illustrated approach to the subject and includes over 200 excellent clinical images
- Full coverage of all acne presentations – acne vulgaris, acne rosacea and acne inversa
- An integrated view of the causes of the varied and overlapping acnes
- Provides preventive, novel and curative approaches to treatment
- Includes medical, surgical, dietary and integrated components of management

Print ISBN: 978-1-118-23277-4 (Cloth) US$135.00 • JAN 2015 • 256PP
Online ISBN: 978-1-118-27234-3

---

**Clinical Dermatology**

*5th Edition*

**RICHARD WELLER, HAMISH HUNTER & MARGARET W. MANN**

- The book has established a reputation as a ‘way of learning’ and is an accessible guide to the subject for aspiring specialists
- The authors have skilfully crafted an easily read text with enough detail to clarify the subject, but not enough to obscure it
- Revised edition contains new chapters on non-invasive physical treatment and dermoscopy, and new material on cosmetic dermatology, surgical dermatology, the skin and the psyche, and dermatoses of non-Caucasian skin
- Contains over 400 high quality pictures and diagrams combined with colourful phrases to illustrate and entertain as it teaches

“...brilliantly succeeds in enticing you to look further. The writing is clear, and the joint British-American authorship avoids any parochial views.” - BMJ

Print ISBN: 978-0-470-65952-6 (Paper) US$75.00 • JAN 2015 • 456PP
Online ISBN: 978-1-118-93816-4
Emergency Medicine & Trauma

Emergency Triage
Telephone Triage and Advice
ALS

❖ Piloted by the North Western Ambulance Service, this book complements the highly successful Emergency Triage based on the Manchester Triage System (MTS), which is used in hospitals worldwide, and acknowledged as an effective form of prioritisation
❖ Provides the necessary information that telephone triage staff must have on hand – including questionnaires and advice to patients who do not need to go into hospital
❖ Hospitals that already using Emergency Triage will benefit from being linked with a telephone triage system that follows the same protocols

Print ISBN: 978-1-118-36938-8 (Paper) US$47.98 • APR 2015 • 192PP
Online ISBN: 978-1-118-36940-1

Geriatric Emergencies
IONA MURDOCH, SARAH TURPIN, BREE JOHNSTON, ALASDAIR MACLULLICH & EVE LOSMAN

❖ A concise, practical and up-to-date guide on the emergency management of the older patient
❖ Covers a comprehensive range of emergencies, emphasizing the different management approaches which may be required in older patients
❖ Common geriatric presentations such as falls, delirium and stroke are explored in detail, in addition to more diverse topics such as abdominal pain, major trauma and head injury
❖ Ethical considerations such as advanced care planning, palliative care and capacity assessment are discussed along with practical tips on communicating with patients and their relatives
❖ Highly recommended for all health professionals working in the acute environment, where a large proportion of patients are aged 65 and over

Print ISBN: 978-1-118-65557-3 (Cloth) US$63.95 • JAN 2015 • 304PP
Online ISBN: 978-1-118-65564-1

The IOC Manual of Emergency Sports Medicine
DAVID MCDONAGH & DAVID ZIDEMAN

❖ Focuses on the fieldside diagnosis and treatment of severe injuries and illnesses that can present at a sports event
❖ Concentrates on basic diagnostic skills and treatment modalities as the sports physician often has limited diagnostic and treatment facilities available on site
❖ Each chapter concentrates on an illness or anatomical injury and offers a structured diagnostic and therapeutic approach in the difficult pre-hospital environment
❖ Includes explanations on what problems to expect in line with specific conditions, and the treatment plans to implement and how to evaluate and reassess those plans

Print ISBN: 978-1-118-91368-0 (Paper) US$71.95 • APR 2015 • 360PP
Online ISBN: 978-1-118-91471-7

Emergency Medical Services
Clinical Practice and Systems Oversight
DAVID CONE

❖ This title is the official textbook of the National Association of EMS Physicians (NAEMSP), for practitioners preparing for the National EMS Medical Directors Course and Practicum.
❖ 2 volume set that comprises:
  ❖ Volume 1: Clinical Aspects of EMS
  ❖ Volume 2: Medical Oversight of EMS
❖ Companion website features supportive self-assessment exercises, audio and video clips.

Print ISBN: 978-1-118-86530-9 (Paper) US$149.95 • JAN 2015 • 1104PP
Online ISBN: 978-1-118-99081-0
Diabetes

**International Textbook of Diabetes Mellitus Two Volume Set**

*4th Edition*

**R. A. DEFRONZO, E. FERRANNINI, P. ZIMMET & GEORGE ALBERTI**

- This comprehensive clinical text is the revised edition of a successful, well-respected medical textbook first published 20 years ago.
- Encyclopaedic, multidisciplinary and international in scope, with coverage on all the aspects of diabetes.
- Topics include epidemiology, diagnosis, pathogenesis, management and complications of diabetes and public health issues worldwide.
- Incorporates a vast amount of new data regarding the scientific understanding and clinical management of the disease, reflecting the substantial advances in the field.
- Comprehensively covers the basic science of metabolism, linking this closely to the pathophysiology and clinical aspects of the disease.
- Edited by four world-famous diabetes specialists, the updated text includes two new sections on NAFLD, NASH and non-traditional associations with diabetes, and clinical trial evidence in diabetes.

Print ISBN: 978-0-470-65861-1 (Cloth) US$559.95 • Mar 2015 • 2100PP
Online ISBN: 978-1-118-38765-8

Gastroenterology & Hepatology

**ERCP**

*The Fundamentals, 2nd Edition*

**PETER B. COTTON & JOSEPH W. LEUNG**

- Authored by the very best, this is the perfect “how-to” guide to mastering a crucial yet complex gastrointestinal procedure.
- Full coverage of the entire range of both standard and advanced techniques, using a highly practical approach.
- Strong focus on patient education, safety, and minimizing risks.
- Includes twenty-four outstanding procedural videos of the experts performing ERCP, ideal for improving best practice techniques.
- Over 250 excellent illustrative photos, X rays, and anatomical drawings.
- “Tips and tricks” and key points throughout to aid rapid understanding.
- Reference to the latest ASGE, ACG, ASG, and UEGW guidelines throughout.

Print ISBN: 978-1-118-76941-6 (Cloth) US$159.95 • Jan 2015 • 456PP
Online ISBN: 978-1-118-76940-9

**Hepatology at a Glance**

**DEEPAK JOSHI, MARGARET KEANE & ALISON BRIND**

- A unique and concise resource on hepatology created for junior medical staff.
- Maintains a practical emphasis, with advice on history, examination and clinical testing.
- Includes clinical scenarios, with self-assessment questions and full explanations to answers.
- Covers key areas such as the development, structure and function of the liver, transplantation, surgery and nutrition, common cases of liver disorders and scenario, and the management of rarer diseases and disorders in special patient groups.
- Follows the curriculum set by and with the support of the British Society of Gastroenterology.

Print ISBN: 978-1-118-75939-4 (Paper) US$41.95 • Apr 2015 • 128PP
Gastroenterology

Mount Sinai Expert Guides: Gastroenterology

BRUCE E. SANDS
(Previously Announced)

- An extremely clinical and accessible handbook covering the major GI diseases and symptoms, their diagnosis and clinical management
- Perfect as a point-of-care resource on the hospital wards and also as a refresher for board exam preparation
- All chapters follow a consistent template and include key points section; classification, pathogenesis and prevention of disease; evidence-based diagnosis and potential pitfalls when diagnosing a patient; disease management; managing special populations and more
- Includes the latest evidence-based results, major society guidelines (ASG/ACG/UEGW) and key external sources to consult
- A companion website with extra features such as case studies, self-assessment questions, key patient advice and ICD codes

Print ISBN: 978-1-118-51996-7 (Paper) US$84.95 • JAN 2015 • 552PP
Online ISBN: 978-1-118-93275-9

Pancreatic Cancer, Cystic and Endocrine Neoplasm

HANS-GUNTHER BEGER, SHUYOU PENG, MICHAEL SARR & AKIMASA NAKAO

- This title is a concise and focused clinical book on the subject of pancreatic cancer
- Written and edited by the same team from the bestselling book, The Pancreas, a leading textbook in the field of pancreas
- Covers the extraordinary developments in diagnostic and therapeutic radiology and endoscopy and the major advances in surgical techniques and basic sciences in recent years
- Discusses the causes of pancreatic cancer and allows clinicians to make progress in early detection and prevention

Print ISBN: 978-0-470-67318-8 (Cloth) US$175.95 • MAR 2015 • 448PP
Online ISBN: 978-1-118-30781-6

Hepatology

Cirrhosis

A Practical Guide to Management

SAMUEL S. LEE & RICHARD MOREAU

- Provides gastroenterologists and hepatologists with an up-to-date clinical guide that presents the very best evidence-based practice in the diagnosis, treatment and management of liver cirrhosis and its many complications
- High-profile editors - from Europe and North America, as well as a range of top international contributors
- Covers both the diagnosis, pathophysiology and clinical management of patients
- Includes hot topics such as “Agents and drugs to avoid” and “Hepatocellular Carcinoma”

Print ISBN: 978-1-118-27482-8 (Cloth) US$143.95 • MAR 2015 • 376PP
Online ISBN: 978-1-118-41264-0

General & Internal Medicine

How to Succeed at Medical School

An Essential Guide to Learning, 2nd Edition

DASON EVANS & JO BROWN

- Written by experienced medical school teachers, this excellent guide is jam-packed with tips on the study skills essential for surviving and thriving at medical school
- Includes insights into what to expect, covering the early days right through to clinical attachments
- Complete with case studies, illustrations, quotes from other students, tip boxes, exercises, portfolios, and learning techniques to help readers communicate, study and revise
- The essential guide for students from the start of medical school to the start of the medical career

Print ISBN: 978-1-118-70341-0 (Paper) US$35.18 • APR 2015 • 256PP
Clinical Skills

Practical Medical Procedures at a Glance
RACHEL THOMAS
✦ Covers all the practical procedures required and provides an invaluable overview of the skills needed throughout medical school and beyond, regardless of specialty
✦ Provides clear explanations of each skill so that they can be efficiently learned and safely practiced
✦ Includes aide-memoires, Multiple Choice Questions and checklists for self-evaluation
✦ Uses large, clear photographs and diagrams in a ‘step-by-step’ approach to each procedure and skill
✦ Features valuable ‘contraindications’ that show when it’s inappropriate to carry out certain procedures

Print ISBN: 978-1-118-63285-7 (Paper) US$45.00 • APR 2015 • 128PP

Hematology

Blood Cells
BARBARA J. BAIN
✦ Enables both the haematologist and laboratory scientist to identify blood cell features, from the most common to the more obscure
✦ Provides essential information on methods of collection, blood film preparation and staining, together with the principles of manual and automated blood counts
✦ Completely revised and updated, incorporating newly published information and includes advice on further tests when a specific diagnosis is suspected
✦ 400 high quality photographs to aid with blood cell identification
✦ Highlights the purpose and clinical relevance of haematology laboratory tests throughout

Print ISBN: 978-1-118-81733-9 (Cloth) US$165.00 • JAN 2015 • 504PP

Infectious Disease

Vaccinology
An Essential Guide (Previously Announced)
GREGG N. MILLIGAN & ALAN D. T. BARRETT
✦ Outlines the entire vaccine development process, from conceptualization and basic immunological principles through to clinical testing and licensing of vaccines
✦ Comprehensively introduces the history and practice of vaccinology, and guides the reader through the basic science relating to host immune responses to pathogens
✦ Covers the safety, regulatory, ethical, economic and geographical issues that drive vaccine development and trials
✦ Presents vaccine delivery strategies, novel vaccine platforms (including experimental vaccines and pathogens), antigen development and selection, vaccine modelling, and the development of vaccines against emerging pathogens and agents of bioterror
✦ Includes sections on veterinary vaccines and associated regulatory processes
✦ A perfect tool designed for undergraduate and graduate microbiologists and immunologists, residents and trainees of infectious disease and vaccinology

Print ISBN: 978-0-470-65616-7 (Paper) US$130.00 • JAN 2015 • 400PP
Online ISBN: 978-1-118-63803-3
Sexually Transmitted Disease

Sexual and Reproductive Health at a Glance
CATRIONA MELVILLE

- A highly-illustrated, visual introduction to all aspects of sexual and reproductive health, from basic clinical examination skills to the management of acute Sexually Transmitted Infections (STIs) and unplanned pregnancy
- Focuses on the fundamental principles in delivering effective contraception and sexual health care and features high-yield information on the essential clinical topics covered in the Community Sexual and Reproductive Health (CSRH) curriculum
- Serves as a quick revision to basic anatomy, physiology and clinical skills and offers balanced coverage of both male and female GU pathology, STIs and contraception
- Includes a companion website that features a selection of case scenarios and interactive flashcards for self-test

Neurology

Ischemic Stroke
Pathways to Treatment
GREGORY J. DEL ZOPPO & JOHN R. MARLER M.D.
- Contains ten sections, each of which will include a variable number of chapters describing the scientific and medical basis underlying the acute intervention of ischemic stroke, along with clinical management advice
- Each section includes a summary prepared by a clinician, along with a discussion on the relevance of the section for a clinical audience
- Highly relevant and practical for everyday use, as compared existing titles in the market
- Essential reference for neurologists and internists who manage stroke patients, as well as emergency medicine physicians, interventional neuroradiologists, and neurosurgeons

Print ISBN: 978-1-405-10367-1 (Cloth) US$115.00 • JAN 2015 • 368PP

Oncology & Radiotherapy

Clinical Oncology and Error Reduction
A Manual for Clinicians
PROFESSOR ANTONELLA SURBONE & PROFESSOR MICHAEL ROWE
- This title is the first single-source reference to address the vital topics of recognizing, preventing, and responding to medical errors in clinical oncology
- Filled with practical information for immediate clinical application
- Covers topics such as patient safety, error prevention, quality improvement, errors disclosure and apology, and the impact of errors on patients and doctors
- Each chapter contains special ‘take home’ points that highlight issues of particular clinical relevance and application
- Written by a multidisciplinary and international team of physicians, nurses, researchers, hospital administrators, bioethicists, patients and patient advocates

Print ISBN: 978-1-118-74906-7 (Cloth) US$TBA • FEB 2015 • 464PP

Evidence-Based Oncology
CHRIS WILLIAMS & PAUL CORNES
- This title was published at ASCO in May 2003 and immediately made a big impact on the world of clinical oncology
- Based on authoritative reviews from Cochrane and other systematic reviews and high quality trials, the recommendations in this book provide unique information for treatment options in the context of the individual patient’s needs
- Updated with 30 new chapters that cover palliative care, delivery of care, along with more emphasis on diagnosis and screening and issues in developing countries
- Relevant for Oncologists, oncology trainees, nurse specialists and heath care providers

Print ISBN: 978-1-405-16003-2 (Cloth) US$270.00 • FEB 2015 • 760PP
Palliative Care

Hospital-Based Palliative Medicine
A Practical, Evidence-Based Approach
STEVEN Z. PANTILAT, WENDY ANDERSON, MATTHEW GONZALES & ERIC WIDERA
✦ The first comprehensive, clinically focused guide to help hospitalists and other hospital-based clinicians provide quality palliative care in the inpatient setting
✦ Written for practicing clinicians by a team of experts in the field of palliative care and hospital care, the book offers:
  ✦ Comprehensive content on three domains of inpatient palliative care: symptom management, communication and decision making, and practical skills
  ✦ Detailed information on the assessment and management of symptoms commonly experienced by seriously ill patients
  ✦ Advise on the use of specific communication techniques to address sensitive topics such as prognosis, goals of care, code status, advance care planning, and family meetings in a patient- and family-centered manner
  ✦ Targeted content for specific scenarios, including palliative care emergencies, care at the end of life, and an overview of post-hospital palliative care options

Print ISBN: 978-1-118-77257-7 (Paper) US$TBA • FEB 2015 • 312PP
Online ISBN: 978-1-118-77260-7

Neonatology

Neonatology at a Glance
3rd Edition
TOM LISSAUER, AVROY A. FANAROFF, LAWRENCE MIALL & JONATHAN FANAROFF
✦ Written by leading international experts, this book provides must-have information on a wide range of common or important neonatal conditions and their clinical management
✦ Each topic is covered in a double-page spread, supported by excellent illustrations, diagrams and, for the first time, 23 video clips showing examination techniques
✦ This title is the perfect guide for all health professionals looking after new-born infants

Print ISBN: 978-1-118-76743-6 (Paper) US$47.95 • MAR 2015 • 240PP

Pharmacology & Pharmaceutical Medicine

Off-label Prescribing
Justifying Unapproved Medicine
DAVID CAVALLA
✦ Off-label Prescribing looks into issues that concern drug regulation, such as the use of drugs on a different group of patients it had been approved for, or at a different dose
✦ This book examines how and why this occurs, what the various medical professions have to say about it, and how pharmaceutical companies benefit by moving into this poorly regulated area
✦ It highlights current practice, its advantages and weaknesses and the author suggests how this practice should evolve in the future

Print ISBN: 978-1-118-91207-2 (Cloth) US$59.95 • FEB 2015 • 150PP
Pharmacy

Phytopharmacy
An Evidence-Based Guide to Herbal Medicinal Products

**SARAH E. EDWARDS**

- This book presents clear, practical and concise monographs on over a hundred popular herbal medicines and plant-based food supplements available over the counter
- It includes the indications and provides a summary appraisal of the clinical and pre-clinical evidence in the use of each medication, along with the potential interactions, contraindications and possible adverse effects
- An overview of the current regulatory framework is also outlined, notably the EU Traditional Herbal Medicinal Products Directive
- Serves as an excellent reference guide for healthcare professionals, including doctors, pharmacists and nurses

Print ISBN: 978-1-118-54356-6 (Paper) US$63.95 • JAN 2015 • 400PP

Psychiatry

Psychiatry, Set

4th Edition (Previously Announced)

**ALLAN TASMAN, JERALD KAY, JEFFREY A. LIEBERMAN, MICHAEL B. FIRST & MICHELLE RIBA**

- The leading reference on all aspects of the current practice and latest developments in psychiatry
  - Written by an international team of recognised expert editors and contributors, *Psychiatry* provides a truly comprehensive overview of the entire field of psychiatry in 132 chapters across two volumes
  - The revised edition includes two new sections - psychosomatic medicine and collaborative care, and emergency psychiatry
  - Includes a comparison on Diagnostic and Statistical Manual (DSM-5) and International Classification of Diseases (ICD10) classifications for every psychiatric disorder
  - Highly relevant for psychiatrists in clinical practice and clinical research, residents in training, and for all those involved in treating psychiatric disorders

Print ISBN: 978-1-118-84547-9 (Cloth) US$490.00 • JAN 2015 • 2776PP

The Maudsley Prescribing Guidelines in Psychiatry

12th Edition

**DAVID TAYLOR, CAROL PATON & SHITIJ KAPUR**

- The essential reference for anyone responsible for prescribing drugs to patients with mental health disorders
  - Provides brief but detailed reviews of psychiatric disorders and relevant psychopharmacology, with general guidance based on the data reviewed and current clinical practice
  - Sections cover plasma monitoring, schizophrenia, bipolar disorder, depression, anxiety, children and adolescents, substance abuse and special patient groups
  - Each section includes a full reference list so that the evidence base can be checked quickly, if required
  - Covers prescription drugs beyond the licensed indications, and their interaction with substances such as alcohol, nicotine and caffeine
  - Relevant for both trainees and experienced clinicians, as it covers important information regarding the rational, safe and effective use of medications, as well as guidance on more complex issues not frequently encountered

Print ISBN: 978-1-118-75460-3 (Paper) US$82.95 • FEB 2015 • 680PP

Troublesome Disguises
Managing Challenging Disorders in Psychiatry, 2nd Edition (Previously Announced)

**DINESH BHUGRA & GIN S. MALHI**

- This book examines psychiatric conditions which are not necessarily uncommon, rare or exotic, but are challenging for the clinician who may struggle to reach a diagnosis and to set up management strategies
- It raises awareness and highlights the dangers of diagnostic systems which may become too influential and perpetuate errors that are detrimental to patients
- For the clinician struggling to understand and treat patients who fail to fit the usual diagnostic categories, *Troublesome Disguises* provides wise instruction on the virtue of entertaining doubts, as well as practical advice for the assessment and management of atypical cases

Print ISBN: 978-1-118-99314-6 (Cloth) US$95.95 • JAN 2015 • 304PP
Online ISBN: 978-1-118-79957-4
ABC of Alcohol
5th Edition
ANNE MCCUNE, ALEXANDER PATON & ROBIN TOUQUET

- Revised and expanded fifth edition with new chapters on alcohol and the young person, alcohol related liver disease, neurological problems, alcohol and the older person, alcohol and cancer, and the alcohol nurse specialist
- Improved coverage on the role of alcohol health workers, along with guidance on the availability of voluntary alcohol services
- It incorporates current NICE guidelines, the UK’s Alcohol Strategy 2012, as well as case study scenarios and examples of best practice throughout

Critical Observations in Radiology for Medical Students
KATHERINE R. BIRCHARD, KIRAN RIDDY BUSIREDDY & RICHARD C. SEMELKA

- A timely, manageable and concise learning resource, with broad topic coverage and enhanced learning features to help students and clinicians answer the question, ‘which test should I order?’ and confidently diagnose and manage conditions
- Delivers comprehensive radiological illustrations of various pathologies on different modalities, guiding the reader through the processes of understanding the different imaging techniques, requesting the most appropriate medical imaging modality and procedure in order to reach a clinical diagnosis
- This comprehensive volume uses a simple and consistent approach to a wide-range of organ-based important pathologies from an imaging point of view
- It includes in-depth evaluations of the strengths and weaknesses for each modality; explanations of the basic physics of different imaging modalities, and an accessible overview of the current FDA and ACR guidelines for imaging safety, radiation risks and special guidelines for imaging children and pregnant women

Print ISBN: 978-1-118-90471-8 (Paper) US$57.95 • A timely, manageable and concise learning resource, with broad topic coverage and enhanced learning features to help students and clinicians answer the question, ‘which test should I order?’ and confidently diagnose and manage conditions

Liver Imaging
MRI with CT Correlation
ERSAN ALTUN, MOHAMED ELAZZAZI & RICHARD C. SEMELKA

- The first single source work to deal with the two primary radiologic modalities in diagnosing and treating benign and malignant diseases of the liver, presented with clearly laid out MRI and CT correlations
- Developed by an editor team led by one of the world’s leading authorities in abdominal imaging, Richard C
- User-friendly, atlas-style presentation, with over 1500 MRI and CT images in over 320 figures that feature state-of-the-art MR and CT imaging sequences, multidetector row CT images, 3D reformatted images, breath-hold MRI sequences, and cutting-edge MR 3T images
- Highly practical approach to the imaging of focal and diffuse liver lesions, complete with relevant and systematic (differential) diagnostic information, the latest references to primary literature and clinical evidence, and patient management possibilities
- Reflects a pattern-recognition approach to MRI and CT imaging, assisting with efficient scanning of images and assessment and diagnosis of disorders

Print ISBN: 978-0-470-90625-5 (Cloth) US$TBA • A comprehensive and easy-to-read overview of all the essentials of respiratory medicine

Lecture Notes: Respiratory Medicine
9th Edition
STEPHEN J. BOURKE & GRAHAM P. BURNS

- A comprehensive and easy-to-read overview of all the essentials of respiratory medicine
- Presents the basics of anatomy and physiology, along with the aetiology, epidemiology, symptoms and management of a wide range of respiratory diseases
- Updated and expanded with materials on radiology, including additional images to show the key clinical features of diseases
- Includes self-assessment material both within the book and on the companion website

Print ISBN: 978-1-118-65232-9 (Paper) US$39.95 • A comprehensive and easy-to-read overview of all the essentials of respiratory medicine

General Surgery

Jones’ Clinical Paediatric Surgery
7th Edition  (Previously Announced)
JOHN M. HUTSON, MICHAEL O’BRIEN, SPENCER W. BEASLEY, WARWICK J. TEAGUE & SEBASTIAN K. KING

- Provides clear-sighted advice on the surgical options available for young patients
- Builds on the popular and successful style of previous editions by employing a systematic approach to childhood diseases that need surgical treatment
- Includes more case vignettes and colour photographs, expanded coverage on the use of imaging, and updated approaches to management, including laparoscopic operations
- Key subject areas are supported by case vignettes in a familiar format similar to what might appear in an OSCE viva

Print ISBN: 978-1-118-77731-2 (Cloth) US$135.95 • JAN 2015 • 344PP

Cardiac Surgery

Perfusion for Congenital Heart Surgery
Notes on Cardiopulmonary Bypass for a Complex Patient Population
GREGORY S. MATTE

- This practical guide for perfusionists and other members of the cardiac surgical team provides information on the devices, technology and techniques required for the successful bypass of patients with congenital heart defects
- Focuses on the latest technology and techniques and provides clear, matter-of-fact guidance based on specific diagnoses
- Written by a seasoned perfusionist who is co-chief and educator at one of the world’s leading children’s hospitals
- Spiral binding allows the book to be laid flat for easy referral in the operating room
- A notes section following each diagnosis enables readers to add institution and/or surgeon-specific information to tailor a bypass plan for each CHD lesion

Print ISBN: 978-1-118-90079-6 (Cloth) US$175.95 • MAR 2015 • 225PP

Urology

Adolescent Urology
CHRISTOPHER R. J. WOODHOUSE

- Provides urologists and pediatric urologists with a comprehensive and expert clinical guide to the main urologic problems that can occur during adolescence
- Fully covers disorders related to sex and genital development, the kidney, bladder, urea and urethra in a systematic manner
- Outlines the best clinical practice in the surgical and medical management of complex and challenging conditions, as well as the long-term outcome for the patient
- Coverage includes the psychological aspect of such disorders: especially how best to manage patients struggling to come to terms with what are very personal and complex issues at what is often a difficult and turbulent period of their life
- Authored by Professor Woodhouse, a world-leading expert and global pioneer in the field
- Well-illustrated with over 120 figures, including step-by-step surgical diagrams throughout, along with a unique “voice of the experts” feature – a running dialogue between leading experts and Prof Woodhouse on the topic in question

Print ISBN: 978-1-118-84481-6 (Cloth) US$143.95 • MAR 2015 • 296PP
Online ISBN: 978-1-118-84483-4
**Overactive Bladder**

*Practical Management*

**JACQUES CORCOS, SCOTT MACDIARMID & JOHN HEESAKKERS**

A consistent, comprehensive and fully up to date approach to OAB, providing urologists with rapid access to specialist clinical guidance

✦ Systematic format with an introductory section covering the definition and pathophysiology of OAB, followed by evaluation, first-line management, second-line management and finally surgery

✦ Well-illustrated throughout, with a 'key points' box outlining the important take-home messages in each chapter

✦ Includes clear management algorithms to aid decision-making, 'Do’s and Don’t' boxes to avoid errors, key references to the top journal articles, and the latest guidelines from the EAU, AUA and other major urology societies

Print ISBN: 978-1-118-64061-6 (Cloth) US$119.95 • FEB 2015 • 264PP

---

**Medical Education**

**Essential Clinical Global Health**

**BRETT D. NELSON**

✦ A brand new evidence-based textbook that provides a clinical overview of the increasingly prominent specialty of global health

✦ Originally developed from a course at Harvard Medical School, the book now includes contributions from nearly 100 world-renowned global health experts from across the globe

✦ Introduces readers to the up-to-date knowledge, skills, and approaches needed for productive and rewarding global health experiences

✦ Includes essential clinical information on the diagnosis, management, and prevention of the leading causes of morbidity and mortality in low- and middle-income countries, along with practical guidance on topics like health systems, population-based approaches, cultural awareness and sensitivity, travel preparedness and safety, and career development in global health

Print ISBN: 978-1-118-63844-6 (Paper) US$75.00 • JAN 2015 • 528PP

**Tips for the Residency Match**

*What Residency Directors Are Really Looking For*

**JUSTIN W. KUNG, PAULINE M. BISHOP, PRISCILLA J. SLANETZ & RONALD L. EISENBERG**

✦ A unique guide for medical students applying for residency positions in the USA

✦ Packed with hints, tips, and recommendations from program directors and current residents and chronologically arranged to cover key information required to excel during the residency application process

✦ Includes advice for preparing the interview and beyond and offers unprecedented access to how departmental decisions about the Match are made

✦ Written by leading Residency Directors and current residents in the major specialties

Print ISBN: 978-1-118-86093-9 (Paper) US$38.95 • FEB 2015 • 298PP

---

**Medical Sciences Special Topics**

**The UMAP Guide to Success in Medical MCQs and EMQs**

**UMAP**

✦ Helps medical students and junior doctors succeed in the critical and increasingly used forms of testing from the Universities Medical Assessment Partnership

✦ Discusses assessment theory with questions like ‘Why do we assess’, and the Methods of assessment, including 100 MCQs (with feedback) and 40 EMQs (feedback)

✦ Provides an insight into the principles of assessment, how assessment items are constructed and quality assurance

✦ Allows readers to better understand how to approach a test, having considered the assessment process from the perspective of UMAP and its examining institutions

Print ISBN: 978-1-405-18719-0 (Paper) US$29.95 • FEB 2015 • 224PP
**Nursing General**

**Anatomy and Physiology for Nurses at a Glance**

IAN PEATE & MURALITHARAN NAIR

- Anatomy and Physiology for Nurses at a Glance covers all the body systems and key concepts encountered from the start of the pre-registration nursing or healthcare course
- Key features:
  - Superbly illustrated, with full colour illustrations throughout
  - Written specifically for nursing and healthcare students with all the information they need
  - Includes a companion website with self-assessment questions for every chapter
- The book is ideal for nursing and healthcare students and qualified practitioners

Print ISBN: 978-1-118-74631-8 (Paper) US$31.95 • MAR 2015 • 176PP

**Pathophysiology for Nurses at a Glance**

MURALITHARAN NAIR & IAN PEATE

- Pathophysiology for Nurses at a Glance covers all the key diseases and disease processes affecting each body system, and key concepts encountered from the start of the pre-registration nursing or healthcare course
- Key features:
  - Superbly illustrated, with full colour illustrations throughout
  - Written specifically for nursing and healthcare students with all the information they need
  - Self-assessment questions provided for every chapter
- The book is ideal for nursing and healthcare students and qualified practitioners

Print ISBN: 978-1-118-74606-6 (Paper) US$39.95 • MAR 2015 • 216PP

**Introductions to Nursing**

**Fundamentals of Children's Anatomy and Physiology**

IAN PEATE & ELIZABETH GORMLEY-FLEMING

- Provides child nursing students and registered nurses with a succinct but complete overview of the structure and function of the child's body, plus clinical applications throughout to demonstrate how the concepts relate to real-life nursing
- Each chapter lists learning outcomes and includes clinical considerations, body maps, a range of high-quality illustrations and test-your-knowledge questions
- Companion website offers further self-assessment and quizzes

Print ISBN: 978-1-118-62505-7 (Paper) US$47.95 • JAN 2015 • 528PP

**Nursing Research**

**The Research Process in Nursing**

7th Edition

KATE GERRISH & JUDITH LATHLEAN

- Comprehensive and thorough in scope, the book compiles all ‘there is to know’ about research methods
- Revised to reflect the significant advances in nursing research and shows the importance of evidence-based practice
- Includes practical information and advice on:
  - How to find and critique the evidence
  - How to choose the right approach
  - How to collect data
  - How to make sense of the data
  - How to put research into practice
- Clear and easy to understand book that links theory with practical steps in the research process and filled with examples to allow readers to apply research concepts to theoretical learning and professional practice
- Suitable for novice researchers yet provides sufficient depth and detail to be of value to experienced researchers and practitioners

Print ISBN: 978-1-118-52258-5 (Paper) US$42.95 • MAR 2015 • 620PP
Fundamentals of Midwifery
A Textbook for Students, with Wiley E-text
LOUISE LEWIS

- Brings together knowledge from a collection of clinical experts and experienced academics to support learning and prepare readers for the challenges in contemporary midwifery healthcare
- Presents the ‘must-have’ information needed, including the theoretical and practical aspects of what it means to be a midwife
- Extensive full colour illustrations, along with activities and scenarios to support readers throughout the education programme
- Essential reading for all pre-registration student midwives, as well as newly qualified midwives

Print ISBN: 978-1-118-52802-0 (Paper) US$42.95 • FEB 2015 • 400PP

The Royal Marsden Manual of Clinical Nursing Procedures
9th Professional Edition
LISA DOUGHERTY & SARA LISTER

- The Royal Marsden Manual of Clinical Nursing Procedures has provided essential nursing knowledge and information on nursing skills and procedures for over 30 years
- Provides up-to-date, detailed, evidence-based guidelines for over 200 procedures related to every aspect of a personal care, including key information on equipment, pre-procedure, procedure and post-procedure guidance, along with full colour illustrations and photos
- Changes to the revised 9th edition:
  - focuses on procedures that are applicable in all areas of acute inpatient care
  - contains the procedures and changes in practice to reflect modern acute nursing care
  - organised and structured to represent the needs of a patient along their care pathway
  - integrates risk-management into each chapter to ensure prominence
- Available as an online edition (www.rmmonline.co.uk)

Print ISBN: 978-1-118-74592-3 (Paper) US$71.95 • MAR 2015 • 1128PP

Wound Care at a Glance
IAN PEATE & WYN GLENROSS

- Combines superb illustrations with accessible and informative text to make the key concepts of wound care easy to understand
- Provides practical guidance for all healthcare professionals who care for people with wounds, or who have an interest in this complex area of healthcare
- Succinctly addresses a wide range of issues, including relevant anatomy and physiology, psychological issues, physical care considerations, patient safety issues, legal and ethical issues, and various treatment and management options

Print ISBN: 978-1-118-68467-2 (Paper) US$34.95 • APR 2015 • 128PP

Acute, Critical & Emergency Care

Critical Care Nursing
Monitoring and Treatment for Advanced Nursing Practice
KATHY BOOKER

- A comprehensive and informative resource for experienced staff nurses and advanced practice nurses working with critically ill patients on ICUs, PCUs, transitional care units and within emergency care departments
- Outlines best practice for the assessment, monitoring and treatment of critically ill adult patients
- Each chapter includes research and evidence-based strategies for treating commonly-seen conditions
- Initial chapters introduce ICU set-up and operation, the rapid response team, vitals measurement and shock management strategies, while subsequent chapters (structured by organ system) focus on care relating to specific organ function and dysfunction, including the respiratory, cardiovascular, neurologic, renal and gastrointestinal systems
- Includes key information on monitoring for overdoses, special considerations in traumatic injury and end-of-life concerns

Print ISBN: 978-0-470-95856-8 (Paper) US$59.95 • FEB 2015 • 336PP
Learning Disability Nursing at a Glance

BOB GATES, DEBRA FEARNS & JO WELCH (Previously Announced)

- Addresses the needs of people with learning disabilities across the life span, from children through to adolescents, adults and older people
- Expertly written by learning disability academic staff and clinicians with highly visual colour presentation throughout
- Aimed at nursing, health and social care students and practitioners, the book embraces both primary and secondary care perspectives
- Supported by a companion website featuring case studies to further test readers’ knowledge

Print ISBN: 978-1-118-50613-4 (Paper) US$34.95 • MAR 2015 • 180PP

Nursing Special Topics

Fundamentals of Paramedic Practice

A Systems Approach (Previously Announced)
SAM WILLIS & ROGER DALRYMPLE

- This title makes paramedic science and pre-hospital care accessible, straightforward and exciting
- It assumes no prior knowledge of the subject, presenting the must-have information that students need about both the theory and practice of what it means to be a paramedic
- Extensive full-colour illustrations throughout, with activities and scenarios, to support paramedic students throughout their course

Print ISBN: 978-1-118-48627-6 (Paper) US$46.99 • JAN 2015 • 488PP

Perioperative Practice at a Glance

PAUL WICKER

- This new title looks at all aspects of caring for patients in the perioperative environment, from pre-operative care, anaesthetic and surgical phases, to post-operation and recovery
- Easy-to-read, quick-reference resource is formatted to convey need-to-know information in both images and text, allowing vital knowledge to be revised promptly and efficiently
- Includes material on advanced skills to support Advanced Practitioners
- A must-have resource for operating department practitioners and students, theatre nurses and nursing students, and trainee surgeons and anaesthetists

Print ISBN: 978-1-118-84215-7 (Paper) US$39.95 • MAY 2015 • 160PP

General & Introductory Veterinary Medicine

Animal Behavior for Shelter Veterinarians and Staff

EMILY WEISS, HEATHER MOHAN-GIBBONS & STEPHEN ZAWISTOWSKI

- Presents and evaluates the available research and programs that address both animal and human behaviours associated with the intake, management and rehoming of dog and cats
- Reviews behavioural reasons for the relinquishment of dogs and cats
- Describes intake and assessment protocol, shelter design, training and enrichment programs that reduce stress and enhance behavioural well-being
- Addresses concepts to improve the adoption process and support the human-animal bond post-adoption

Print ISBN: 978-1-118-71111-6 (Paper) US$79.99 • MAR 2015 • 400PP
Veterinary Anesthesia, Analgesia & Pain Medicine

Veterinary Anesthesia and Analgesia
The Fifth Edition of Lumb and Jones
KURT A. GRIMM, LEIGH A. LAMONT, WILLIAM J. TRANQUILLI, STEPHEN A. GREENE & SHEILA H. ROBERTSON

✦ A gold-standard reference for anesthesia and pain management in veterinary patients
✦ Provides a thoroughly updated and comprehensive account on veterinary anesthesia and analgesia, combining state-of-the-art scientific knowledge and clinically relevant information
✦ Covers immobilization, sedation, anesthesia, and analgesia of companion, wild, zoo, and laboratory animals
✦ Takes a body systems approach for easier reference to information about anesthetizing patients with existing conditions
✦ Updated with 10 completely new chapters with in-depth discussions of perioperative heat balance, coagulation disorders, pacemaker implantation, cardiac output measurement, cardiopulmonary bypass, shelter anesthesia and pain management, anesthetic risk assessment, principles of anesthetic pharmacology, and more
✦ Fully coloured with over 400 images

Print ISBN: 978-1-118-52623-1 (Cloth) US$TBA • APR 2015 • 1120PP

Veterinary Internal Medicine

Clinical Reasoning in Small Animal Practice
JILL E. MADISON, HOLGER A. VOLK & DAVID C. CHURCH

✦ Written by internationally renowned clinicians and educators experienced in the subject of clinical reasoning
✦ Key features:
  ✦ An easy to remember and logical approach to solving a wide range of clinical problems encountered in small animal medicine and neurology
  ✦ Flowcharts and key step markers throughout to help illustrate the decision making process
  ✦ Offers readers the ability to solve cases more efficiently, resulting in better treatment and care for pets and happier owners
  ✦ An invaluable resource for every level of learner, from students to experienced practitioners

Print ISBN: 978-1-118-74175-7 (Paper) US$47.95 • FEB 2015 • 264PP

Differential Diagnosis in Small Animal Medicine
2nd Edition
ALEX GOUGH & KATE MURPHY

✦ Brings together comprehensive differential diagnosis lists, covering a wide range of presenting signs
✦ Updated with alphabetical lists for improved navigation and fully covers the majority of presentations that are encountered in practice, including both common and uncommon conditions
✦ Details differential diagnoses from diverse findings such as history, physical examination, diagnostic imaging, laboratory test results and electrodiagnostic testing
✦ Useful throughout the working day for vets in small animal practice, saving them the need to search across multiple references
✦ Available as an app for iOS and Android devices

Seizures in Dogs and Cats
SEAN SANDERS

✦ A practical and complete resource for the veterinary management of seizures in dog and cat patients
✦ Designed for ease of use in the clinical setting, presenting clinically oriented information on the etiology, diagnosis, and management of seizures
✦ Coverage includes the history, biology, and classification of seizures, diagnosis, medical and surgical treatment, emergencies, and complementary medicine
✦ Each chapter begins with key points, followed by the finer details, making the book equally useful for fast access during the exam and for further reference

Online ISBN: 978-1-118-68969-1
Small Animal ECGs
An Introductory Guide, 3rd Edition
M. W. S. MARTIN & MIKE MARTIN

- Provides all the information veterinarians need when using electrocardiography techniques for the first time
- An ideal introduction to veterinary electrocardiography written in a very easy to understand manner
- The author is a Recognised Specialist in Veterinary Cardiology (RCVS) and regularly speaks on this subject
- Full of examples of colour ECG tracings and illustrations to explain arrhythmias
- Covers techniques that can readily be used in first opinion small animal practice
- Includes new chapters on mechanisms of supraventricular arrhythmias, accelerated idioventricular rhythm and use of Holters

Veterinary Imaging

Atlas of Small Animal CT and MRI
ERIK WISNER & ALLISON ZWINGENBERGER

- Atlas of Small Animal CT & MRI is a highly illustrated diagnostic imaging guide to common clinical disorders of dogs and cats
- Contains over 3,000 high quality CT, MRI and related diagnostic images
- Offers a unique approach emphasizing comparative imaging and pathologic correlation
- Focuses on important imaging features relevant to imaging diagnosis of disease in dogs and cats
- Written by internationally renowned experts in the field

Atlas of Small Animal Ultrasonography
2nd Edition
DOMINIQUE PENNINCK & MARC-ANDR D’ANJOU

- Provides a comprehensive collection of more than 200 high-quality images, including both normal and abnormal ultrasound features, as well as relevant complementary imaging modalities and histopathological images
- Covers both common and uncommon disorders in small animal patients
- Offers new chapters on practical physical concepts and artifacts and abdominal contrast sonography
- Includes access to a companion website with over 140 annotated video loops of the most important pathologies covered in each section of the book

Veterinary Image-Guided Interventions
CHICK WEISSE & ALLYSON BERENT (Previously Announced)

- This is the only book dedicated to interventions guided by imaging technology
- Written and edited by respected pioneers in the field, topics include interventional endoscopy, cardiology, oncology and radiology
- Chapters cover the history and background of the procedures, patient work-up, equipment lists, detailed procedural instructions, potential complications, patient follow-up protocols, and expected outcomes
- Split into body systems, the technical aspects of each procedure are presented using highly illustrated step-by-step process
- Companion website offers videos of many procedures to enhance the text
- A must-have handbook for internists, surgeons, cardiologists, radiologists, oncologists and criticalists, and for anyone interested in cutting-edge developments in veterinary medicine
Designed to be used every day in the fast-paced veterinary setting, with dosages for a wide range of 43 new drugs covered, as well as updated dosages and information for existing monographs, along with new appendices that cover multidrug sensitivity in dogs and compounds potentially toxic to animals.

Plumb’s Veterinary Drug Handbook

This is the 8½ x 11-inch desk size, offering enhanced readability and ease of use; Plumb’s Veterinary Drug Handbook is also available in a convenient 5 by 8-inch pocket size.

Plumb’s Veterinary Drug Handbook is an up-to-date edition of the most complete guide to drug dosing information for animals.

New edition features fewer dosages per indication and clearer guidance on selecting a dose.

43 new drugs covered, as well as updated dosages and information for existing monographs, along with new appendices that cover multidrug sensitivity in dogs and compounds potentially toxic to animals.

Designed to be used every day in the fast-paced veterinary setting, with dosages for a wide range of species, including dogs, cats, exotic animals, and farm animals.

The book is also available in an 8 ½ x 11-inch desk size, offering enhanced readability and ease of use.

Small Animal Ophthalmic Atlas and Guide

Small Animal Ophthalmic Atlas and Guide offers fast access to a picture-matching guide to common ophthalmic conditions and key points related to diagnosing and managing these diseases.

Presents photographs of ophthalmic abnormalities with brief descriptions to aid diagnosis.

Includes concise, clinically oriented descriptions of disease processes, diagnostic tests, and treatments for each condition.

Serves as a useful tool for quickly and accurately formulating a diagnosis, diagnostic strategy, and treatment plan for small animal patients.

Highly recommended for small animal general practitioners, veterinary students and interns seeking a quick yet complete guide to small animal ophthalmology.
**Veterinary Surgery, Orthopedics & Trauma**

### Advances in Equine Upper Respiratory Surgery

**JAN HAWKINS**

- Part of the Advances in Veterinary Surgery series co-published with the ACVS Foundation, this book covers the most common upper respiratory diseases, with in-depth information on laryngeal hemiplegia and dorsal displacement of the soft palate.
- Presents theory and background, along with detailed procedures information.
- Reflects on the current state of the art, offering a significant update on disorders of the nasal septum, nasal passage, paranasal sinuses, hard and soft palate, epiglottis, arytenoids, guttural pouch, and trachea in the horse.
- Includes 200 images illustrating key points of each surgical procedure, along with discussions on the potential complications and expectation management.

Print ISBN: 978-0-470-95960-2 (Cloth) US$149.99 • JAN 2015 • 296PP
Online ISBN: 978-1-118-83418-3

### Advances in Intervertebral Disc Disease in Dogs and Cats

**JAMES FINGEROTH & WILLIAM THOMAS**

- An authoritative reference for understanding and treating disc disease, along with sound scientific and clinical basis for decision making.
- Offers an objective synthesis of current literature and provides guidance on the approach to a potential disc rupture, surgical and medical strategies, and management of the patient.
- Provides a complete understanding of intervertebral disc disease, along with description and discussion on the controversies and issues surrounding the topic, while acknowledging the gaps in current knowledge.

Print ISBN: 978-0-470-95959-6 (Cloth) US$124.99 • JAN 2015 • 336PP

### Veterinary Medicine / Small Animal General

### BSAVA Manual of Canine Practice

**TIM HUTCHINSON & KENNETH R. ROBINSON**

- Authored by practitioners with many years of experience in general practice.
- Aims to provide the first port of call for the busy practitioner faced with uncertainty over a new case.
- Common sense, first line approaches are given in a problem oriented setting, stemming from the nose to tail examination.
- The Manual is broadly divided into three sections: The Art of Canine Practice Common Consultations Common Clinical Presentations.

Print ISBN: 978-1-905-31948-0 (Paper) US$157.95 • FEB 2015 • 320PP

### Veterinary Medicine / Exotic Pets

### Dentistry in Rabbits and Rodents

**ESTELLA BÖHMER** (Previously Announced)

- A practical guide aimed at helping clinicians successfully diagnose and treat dental problems in rabbits and rodents within their own surgeries.
- Covers the dental anatomy and physiology of all small mammal species commonly kept as pets.
- Richly illustrated with high quality photographs and describes pathological findings before selecting the appropriate therapy and treatment.
- Different treatments and the advantages and disadvantages of each are discussed after a diagnosis has been reached.
- Describes intraoral radiography and innovative positioning for imaging the guinea pig and chinchilla dentitions, allowing the practitioner to visualize each tooth in detail.
- Offers helpful directives for approaching and treating dental disease without the need for referral to a specialist or the use of expensive equipment.

Print ISBN: 978-1-118-80254-0 (Cloth) US$134.99 • MAR 2015 • 304PP
Online ISBN: 978-1-118-80255-7
**Exotic Animal Hematology and Cytology**
4th Edition
TERRY W. CAMPBELL

- *Exotic Animal Hematology and Cytology* is one of the most comprehensive references available on exotic animal hematology and cytology of all major species
- Acts as both an atlas and text, offering high-quality photographs and step-by-step descriptions of techniques associated with preparing and interpreting hematology and cytology samples
- Presents complete information on hematology and cytology in a wide range of exotic species, including small mammals, birds, reptiles, amphibians and fish
- Includes more than 700 high-quality color photographs, with sizing bars
- Takes a new disease-based structure for improved ease of use and provides straightforward step-by-step descriptions of sample preparation and interpretation

**Veterinary Medicine - Farm Animals**

**Bovine Medicine**
3rd Edition (Previously Announced)
PETER COCKCROFT

- Offers practicing large animal veterinarians and veterinary students a comprehensive reference to core aspects of contemporary cattle health and husbandry
- Revised edition features thoroughly rewritten text, with coverage shifted to the core aspects of everyday cattle practice
- Includes new focus on both applied skills and application of knowledge, along with more full-colour illustrations than previous editions
- Represents a toolkit of skills that will support the delivery of contemporary cattle practice
- Presents a seamless integration of information on husbandry, nutrition, and disease
- Written by a wide range of experts from around the world

**Gracey’s Meat Hygiene**
11th Edition (Previously Announced)
DAVID S. COLLINS & ROBERT J. HUEY

- *Gracey’s Meat Hygiene* is the definitive reference for veterinarians working in meat hygiene control
- Revised edition reflects the significant changes in science, legislation and practical implementation of meat hygiene controls in the UK, Europe and worldwide since 1999
- New chapters address the increased concern of both the public and inspectors to issues of animal welfare and the recognition of the profession
- Updated layout features colour photographs and illustrations throughout
- New content on meat hygiene inspection, food safety management system and animal health and welfare controls in the ‘farm to fork’ system
- An excellent practical reference that also serves as a teaching guide for veterinary students, as it lays the foundations of food animal anatomy, pathology and disease

**Veterinary Medicine - Equine**

**Equine Fluid Therapy**
C. LANGDON FIELDING & K. GARY MAGDESIAN

- The first full colour, single volume reference on equine specific fluid therapy
- Offers current information on the research and practice of fluid, electrolyte, and acid-base disorders for horses
- Designed to be clinically oriented yet thorough
- Provides detailed strategies tailored to equine practice
- Includes information on physiology, acid-base balance, fluid therapy, to specific conditions in both adult horses and foals
- Serves an essential reference for equine practitioners, specialists, and researchers
Practical Clinical Epidemiology for the Veterinarian
AURORA VILLARROEL

- Provides thorough coverage of the fundamentals of epidemiological concepts, situated within the context of daily clinical practice.
- Examines epidemiology from the lens of daily clinical practice to offer a truly practical approach.
- Demonstrates the relevance of epidemiology to clinical problems faced in the field using practical examples to clarify the concepts.
- Includes clinical cases from all species, with an emphasis on small animal and equine medicine to demonstrate the concepts.
- Uses an easy-to-read approach, with graphs, flowcharts, and tables to promote understanding.
- Includes access to a companion website with exercises for study and review.

Clinical Pathology and Laboratory Techniques for Veterinary Technicians
ANNE M. BARGER & AMY L. MACNEILL

- Provides a comprehensive reference on laboratory procedures and features ‘how-to’ information as it pertains to small animals, horses, and cattle.
- Provides information on hematology, hemostasis, clinical chemistry, urinalysis, parasitology and fecal testing.
- Features high-quality photographs labelled with magnification and stain information, which clearly depict cellular morphology, inclusions and infectious organisms.
- Offers key objectives, technician tip boxes, case examples and a glossary of key terms.
- Companion website provides images from the book for download, instructor questions and answer key to multiple choice questions in the book.

Nutrition and Disease Management for Veterinary Technicians and Nurses
2nd Edition
ANN WORTINGER & KARA BURNS

- Provides a complete reference to veterinary nutrition, from the fundamentals to feeding companion animals of any age and health status.
- Provides information on nutrition in birds, small mammals, horses, in addition to dogs and cats.
- A new section on managing disease through nutrition, with 10 new disease chapters.
- Provides information on hematology, hemostasis, clinical chemistry, urinalysis, parasitology and fecal testing.
- Includes an up-to-date and easy-to-read approach, with graphs, flowcharts, and tables to promote understanding.
- Includes clinical cases from all species, with an emphasis on small animal and equine medicine.
- Includes access to a companion website with case studies, review questions and answers, and the figures from the book in PowerPoint.

Surgical Patient Care for Veterinary Technicians and Nurses
GERIANNE HOLTZMAN & TERI RAFFEL

- Surgical Patient Care for Veterinary Technicians and Nurses is a highly practical reference covering all aspects of caring for canine and feline surgical patients.
- Covers all tasks associated with small animal surgical patient care, from the initial exam to discharge.
- Offers clear descriptions of common surgical assisting procedures and their etiology.
- Presents 285 full-color clinical photographs to demonstrate common surgical instruments, procedures and patient care.
- Includes chapters on the history and physical examination, pre-operative planning, asepsis, surgical assisting, procedures, wound management, postoperative care, and aftercare.
- Includes chapters on the history and physical examination, pre-operative planning, asepsis, surgical assisting, procedures, wound management, postoperative care, and aftercare.
- Provides a complete reference to veterinary nutrition, from the fundamentals to feeding companion animals of any age and health status.
- Includes access to a companion website with review questions and answers, as well as figures from the book.

Wiley E-Textbook

Wiley E-Text: Powered by VitalSource, are downloadable electronic versions of a textbook.

Why not recommend a Wiley E-Text to your students?

When you recommend e-textbook for your course, you not only save your students money, but you also give them the opportunity to benefit from the portability and functionality that digital provides.

Access your resources in 3 ways:

Download to your PC or Mac
Online anywhere, anytime
On the go from your iPhone, iPad, Android

Search to locate key concepts.
Highlight and colour-code as you read.
Make notes for revision.
Share notes with others.
Synchronise notes and highlights between all your devices.
